Candidates For Mayor Tell About Selves

Under sponsorship of the North Shore Political club a mass meeting was held in the Ocean Beach Woman's clubhouse Tuesday evening, to which all candidates for mayor of San Diego had been invited. Fred Wallace, chairman of the meeting, introduced the candidates and officiated.

C. Leon De Aryan was the first speaker and said he was the only strictly dry candidate and would clean out racketeers from the town if elected. His more detailed platform will be found elsewhere in the News.

D. M. Denton was the second candidate and said he was FOR the beaches and realized their value, also believed they did not get the proper recognition from present authorities. He promised the city a business administration if elected and stated that men of business ability and integrity could build a wonderful city here and induce many great institutions to locate in San Diego.

Leroy Goodbody was unable to be present and Dr. J. Edwin Armstrong spoke for this candidate, reading a portion of his platform to the audience.

Wm. E. Harper, one time mayor of Coronado and for six years state senator, said he had actual political experience of ten years or more, was a student of local and state government and referred proudly to his record as such. He thought the city charter was the main issue and should have a fair trial, which so far it had not had.

A. Ray Sauer, editor of the San Diego Herald and for six years mayor of East San Diego, said if elected he would work earnestly for the city and see that the city council did the same.

Rufus S. Hendon, retired Navy man, said among other things that the civic center should be started at once and believed this could be done from the city budget without the voting of bonds by the people. He promised a strictly business administration if elected.

Harry C. Steinmetz, seventh candidate to be presented, dwelt mostly upon municipal ownership of utilities, said he firmly believed in public ownership and that 84 cities, mostly small ones, were operating their plants successfully, though some of the larger west coast cities also operated their plants to advantage. He said he would make no promises but would work for the city and the benefit of its people.

Henry Cramer, last mayoralty candidate on the program, said city needs had been well covered by the others, so confined himself more to personal information; that he was a native San Diegan, resident of Point Loma, and if elected would conduct the office with integrity and ability.

Alvin Baranov, candidate for the new office of police court, was the last speaker, he described the creation of this new police court to be presided over by a police judge, which office he sought. Gave his legal experience and promised efficient conduct if elected.

VISITING NURSES TELL KIWANIANS OF PROGRAM

Dr. John W. Wilhoit was program chairman for the day, Wednesday at Kiwanis luncheon, having for speaker Mrs. J. M. McColl, a representative of the Visiting Nurses association, who present the association's worthy cause before the club in a highly interesting manner.

Harold Kimball, principal of Cabrillo school, was a guest of the chairman and said his school had children from seventeen different nationalities. Arthur Romero, one of the pupils, gave accordian and piano numbers and Marion Nancy Wilhoit gave piano and violin selections.

Dr. Parks gave a report of the Yuma meeting last Saturday evening.

Milton Lancaster, manager of the Safeway store on Newport avenue was a guest of Dr. Parks.

John H. Scott of Brooklyn, N. Y., was a visiting Kiwanian.

Next Wednesday the La Jolla Kiwanis club will come to Ocean Beach and put on the program.

TRANSAMERICA CORPORATION 1934 EARNINGS EXCEED 1933

San Francisco, March 14—Net profit of Transamerica Corporation including its proportion of net profits of consolidated companies and all controlled subsidiaries, and after taxes of $3,615,827, totaled $11,450,587 for the year 1934, equal to 48.47 cents a share on 23,621,897 shares outstanding December 31, 1934, John M. Grant, president, anounces.

"The 1934 earnings, which were almost twice the amount of dividends paid during the past year, were slightly in excess of 1933 earnings," said Grant. "Dividends aggregating $5,902,715 were paid during the year ended December 31, 1934, and a further dividend at the rate of 12½ cents a share was paid January 31, 1935.

"The consolidated balance sheet of Transamerica Corporation and consolidated companies as of December 31, 1934, show that since the return of the Giannini management to control in February, 1932, capital and surplus have increased from $131,121,778 on December 31, 1931, to $143,673,437 on December 31, 1934, after payment of the $5,902,715 on dividends, and that notes payable to banks and accounts payable have been reduced by the net amount of $10,624,901 in the three years. Total assets of the company on December 31, 1934, stood at $218,386,613.

"General and administrative expenses of Transamerica Corporation and consolidated companies for 1934, including interest, taxes, transfer fees, etc., showed a decrease of 19 percent due to the continuation of the management's effective program of economy.

"For the first two months of 1935, normal operating earnings of Bank of America alone totaled $2,064,530, as compared with $1,617, 525 for the same period of 1934. This represents an increase of 27 percent. All losses andother charge-offs of Bank of America during the depression years have been provided for without recourse to the issuance of additional stock."

CITY SEEKS PERMISSION FOR RECREATION PIER

Application soon will be filed by the city for permission to construct a 1500-foot recreation pier at Ocean Beach it was announced at the city attorney's office Saturday, where the papers are being prepared.

The application will be sent to the army district engineer, as a necessary preliminary to the permit required for constructing piers.

The proposed pier is to be 20 feet wide and the proposed location is at the foot of Del Monte Ave.—S. D. Union.

THRONGS IN OLD TOWN AT FIESTA

Casa de Lopez, one hundred years old and first adobes of Old Town, welcomed early Californians and all of San Diego in the fiesta sponored by Los Surenos club last Saturday afternoon.

Mrs. J. Wm. Fisher, originator of the fiesta, welcomed visitors gowned in a golden satin Spanish ball gown, over which fell a salmon pink mantilla. Mrs. E. W. Curtis wore a round black Mexican riding hat with red band and Spanish shawl. Mrs. Ed Goodwin wore yellow satin with black overlace and mantilla and Mrs. Winifred Davidson was a madonna-like figure in her modest dark gown.

The successful fiesta is the first of a monthly series, the second will be Horton Day, about April 15 also celebrating a historic event.

Forum Speaker Doubtful About Public Ownership

Presenting both the pro's and the con's of municipal ownership of utilities Assistant City Attorney Gilmore Tillman spoke to an interested audience Tuesday evening at the third Town Hall meeting in the Ocean Beach school auditorium.

Mr. Tillman represented the city in the recent gas-rate litigation and he confined himself entirely to the local situation, the prospects and possibilities of municipal ownership in San Diego. He expressed himself as being thoroughly convinced that if a municipal plant were efficiently run "the cut in rates could be enormous." For one thing the city could borrow money at much lower interest rates than can a private company, for another there would be no profits to pay.

On the other hand Mr. Tillman expressed serious doubts as to whether the city could operate a plant efficiently. He pointed out that pressure of politics would tend to create unnecessary jobs, would tend toward unnecessary personnal upheavals and would tend to keep competent men out of the plant. Also, he pointed out, there might be some difficulty in expanding or changing the physical properties of a municipal plant.

Mr. Tillman further stated our municipal water system was subject to the same difficulties but that it was operating efficiently and had done so for many years.

The speaker explained the complex holding company control of the local company and characterized it as being the type of control that is being so severly criticized thruout the nation today.

The meeting was opened by a series of numbers from the SERA string quartette and from the La Jolla high school girls' double quartette The quartette was directed by Earnest H. Wilcox.

MRS. MUEHLEISEN and DARNALL ENDORSED BY EDUCATIONAL LEAGUE

Co-operation with the Board of Education in formulating an orderly plan for continued development of the public schools, and support of the candidacies of two incumbents of the board seeking re-election, are the announced objectives of the recently organized Progressive Educational League.

Candidates indorsed by the league are Mrs. Vesta C. Muehleisen and Orton E. Darnall, each of whom has served eight years on the Board of Education.

Included in the long list of persons who will be actively identified with the league are Douglas Young, Clifford K. Fitzgerald, Dr. F. A. Willier, F. L. Annable, R. W. Mosher, John O'Hair, Fred J. Hansen, Will Angier, Harry Dort, Mrs. Julia McKinney, W. Templeton Johnson, Jacob Weinberger, Nate Baranov, Claude Woolman, Mrs. Ethel Mintzer, Edgar A. Luce, Nel E. Brown, Mrs. Eltha Kissell, Armistead Carter, Mrs. M L Thompson, Donald C. Burnham, Claude Morrison, Dr. Paul E. Wedgewood, Capt. C. A. Brinkley, Walter Bellon, W. L. Baskerville, Ben Brunham.

Pledging themselves to concerted action in the interests of the schools the league declares: "Mrs. Muehleisen and Mr. Darnall represent the type of board members whose wide experience and temperamental fitness make them splendidly equipped to guide the destines of our public school system. Because of their service on the board, they have an intimate knowledge of the many important details connected with administration of the schools.

"The Progressive Educational League does not question the integrity of other candidates for the board, but sincerely believes the interests of the public schools, school children and parents will better be served by retention of Mrs. Muehleisen and Mr. Darnall on the board We recommend them to the earnest consideration of all friends of the public schools."

BAPTIST CHURCH SERVICES

"Christianity' Contribution to Our Day" will be the pastor's sermon theme for the morning hour of worship at 11 o'clock.

The Young People's society meets at 6:45 p m. Miss Margie Linthicum will lead in the discussion of the subject "Relationship Of Youth To Parents".

At 7:30 p. m. in answer to numerous questions, the pastor will speak on the subject "Does Death End All?"

You are cordially invited to these services.

Beach Pleasures To Be Told To The World

Winner Travelogue To Tell Story For Three Months On Powerful Air Station.

The Ocean Beach News comes to its readers one day earlier than usual this week to announce the opening broadcast of a radio program which starts tomorrow morning, Friday, March 22, at 7:30 a. m., over XEMO, the Foreign club station.

This radio program is to boost Ocean Beach and the business of its sponsors. The program will be carried out under present plans for three months from this powerful radio station and will without question bring to thousands of listeners a message from Ocean Beach, telling of our favorable location on the shores of the Pacific and other delightful advantages.

In addition to the half hour broadcast over XEMO, Ocean Beach will receive an introduction every week for twelve weeks, over KFJR, at Portland, Oregon. Our location and advantages will be stressed as well as the names of the sponsors of the XEMO program.

The Ocean Beach News, local merchants and apartment places will cooperate in this sending forth of a message from Ocean Beach, in a musical program interspersed with facts about Ocean Beach and a short mention of each sponsor, those taking part are The Ocean Village, Richley Hardware, Kraft's Drug Store, Silver Spray Apt. Hotel and Plunge, Fried's Department Store Bert W. Wenrich, realtor, Strand Radio Co., Sunset Cliff's Service Station and Garage, Ocean Beach Cleaners and Elenia's Beauty Shop.

Tune in tomorrow morning, 7:30 to 8 a. m., for the first Ocean Beach program, XEMO, 865 kilocycles.

On the following Friday, March 29th, this program will be given from 3 to 3:30 p. m.

NELSON HALL AT MISSION BEACH SATURDAY NIGHT

As this week's attraction at the Mission Beach ballroom Mr. Northern has succeeded in booking Nelson Hall and his orchestra for a one night engagement this coming Saturday night.

Nelson Hall is a widely known vocalist having sung with the famous Ben Bernie for two years and with Gus Arnheim for over three years. His orchestra for the last two years has been playing at the Congress hotel and the Trianon ballroom in Chicago and have recently closed an engagement at the Hollywood Roosevelt hotel.

When Hall arrives at the ballroom this coming Saturday night he will bring with him his entire group of artists as they were featured at the Roosevelt hotel.

Methodist Episcopal Services

"The Reality of the Spirit" is the subject for the sermon next Sunday morning at The Methodist church. Rev. James H. Hughes, pastor of the church, will preach. The sermon is in connection with a series of Lenten addresses based on The Apostles' Creed. The purpose is to oiscover in the older creeds that which may be made experiential to present times.

The music for the service will be in charge of Mrs. Anna Forsythe.

The Sunday school meets every Sunday morning at 9:45. Classes are conducted for peaople of all ages.

Evening service in charge of the young people, beginning at 7 o'clock. Mrs. Hughes will lead.

All are welcome to worship with us

V.F.W. America's "Old Guard" The Veterans of Foreign Wars

LIEUT. BERT A. ALLEN POST No. 2415 AND AUXILIARY

At the last meeting of the post it was unanimously voted that the Kiwanis club be supported in their endeavor to obtain much needed improvements on the Ocean Beach school recreation grounds. To that end a letter has been written to the City Playground commission, calling their attention to the present inadequate facilities and run-down condition of the grounds and requesting that action be taken to place them in suitable condition. At the present time the playgrounds are not in a state of repair to make them attractive to those seeking outdoor recreation Nor are the facilities available sufficient to create a desire on the part of those interested, to attract them.

At the present time Ocean Beach is one of the very few districts of San Diego which is without a well equipped and flood-lighted playground where our youngsters may put in their leisure evening hours at beneficial pastimes.

James E. Carr and Harry S. Remington were elected to membership. Comrade Carr saw foreign service on the frozen tundras of Siberia in the days of '18 and '19, while Comrade Remington, being a Marine, won the war in France and Germany. Comrade Remington is a Purple Heart Medalist, having been severely wounded in action at Blois de Belleau France in June, 1918.

Comrade Kohler has been appointed historian and maintains that H. G. Wells will have nothing on him.

Comrade Speer has been appointed chairman of the entertainment committee. Now that Tex Rickard and Ziegfield have gone to their reward and their places in the entertainment wold have since been vacant, there is little doubt but what the Marine wil soon fill a long needed want in the daily lives of the great American people.

As a starter he can practice on the monthly card party to be given by the post and auxliary at the Woman's club on Thursday March 28th.

V. F. W. AUXILIARY

The ladies auxiliary to the Lt. Bert A. Allen post No. 2415 Veterans of Foreign Wars are holding their monthly food sale at the Ocean Beach Hardware on Newport ave. Try us—we aim to please.

An interesting meeting of the Bert Allen auxiliary was held on March 14th The reports of committees on Americanization and legislation gave evidence that we are up and doing. It was good to see so many visitors including our Deputy Dept. Inspector Ruth Palmer and the County Council President Ida Fastnacht. Mrs. Palmer will make her official inspection of our auxliary at the next business meeting in April and we hope to see all members present at that time.

Thursday March 28th the Lt. Bert A. Allen post and auxiliary will hold a joint card party at the Ocean Beach Woman's club. Bridge, five hundred and other games may be played. Appropriate prizes will be awarded. The proceeds to aid the organization in carrying on its work.

Construction of Houses Becoming More Active

Tuesday's building permits shows increased interest in building activity in Mission Beach and this section, two new houses at our neighboring beach on the north and other improvement under way.

S. F. Healey, frame-stucco cottage at 702 Jersey court, $2900.

Same, frame apartment and garage at 3330 Strand way, $1920.

Dr. G. H. McLillan, per Charles M. Lutes, porch and garage, 4375 Trias street, $475.

Fidel Nunez, addition $150, 3028 Carleton street.

OCEAN BEACH SCHOOL

The kindergarten rhythm band was requested to entertain Wednesday evening at the Harvey hall in San Diego. Miss Eula Huston, a pupil, danced a Gypsy dance.

Many interesting things are happening in the various rooms now. Mrs. Karl's L-1 group has completed a playhouse, which is calsomined on the outside and papered on the inside. The children are making furniture for it now.

Miss Van Horn's L-2 students are making a toy town of Ocean Beach, which includes the stores, oil station, police station, churches and cottages. Airplanes and boats surround the toy beach.

Miss Barnes' L-3 pupils are studying the sources of food supply in San Diego including the different types of food necessary to our daily life, as truck gardening, fruit, grains, meats and milk and milk products. They are building a grocery store. The boys and girls have also planted a vegetable garden, which they hope to sell in their store this spring. They have written many stories and illustrated them about their store and garden.

The H-3's of Miss Lipp's room are studying milk. The class took a trip through the Qualitee Dairy last week. They are making "milk" books for their language study. The room has many appropriate milk posters.

Miss Figgins' 5th and 6th graders are studying "light," and they are making various kinds of lights. Mr. Wilson's 6th graders are studying the development of Communication, and the recording of ideas.

Miss Shea's 6-As and 6-Bs are studying harbor cities, which includes lighthouses, ships and their cargoes, shipping news, old and new ships and harbors visited.

VISITORS HONORED AT LUNCHEON

Mrs. E. J. Baker entertained in her home, on Long Branch avenue, last Thursday, with a St. Patrick's luncheon, honoring Mrs. Emma Corder and Mrs. Catherine Fryer who are wintering in Ocean Beach and San Diego. The St. Patrick motif was carried out with flowers throughout the rooms and the luncheon table was decorated with dainty flowers and green tapers. Pit was enjoyed during the afternoon with Mrs. Dunn and Mrs. Fryer winning prizes.

Invited guests were: Mrs. Emma Corder, Mrs. Catherine Fryer, Mrs. Sarah Dolen, Mrs. Loma Dunn, Mrs. Martha Burgess, Mrs. Marie Wetmore and Mrs. Schofield. Gifts were presented to the honored guests by the hostess.

WARREN WALKER SCHOOL

During opening exercises the students under the direction of Miss Newlon have been learning poems appropriate for the month of March. They have learned "The Night Wind" by Eugene Field and "Windy Nights" by Robert Louis Stevenson. Next week, Memory Gems are to be discussed and learned.

Due to the recent rains, California has a profusion of wild flowers. Miss McIntyre and Beverly Parks made trips to Imperial valley over the week end. They saw many desert flowers among which were Spanish Daggers, Cactus Blooms, Ocotillo, and other desert plants.

Jean Pape took a trip to San Diego's back-country where she saw the following wild flowers; wild peony, wild violet, California four o'clock, wild lilac and deerweed.

—Joycelyn Watters.

SAN DIEGO METHODIST UNION

The San Diego Methodist Union will meet at the Ocean Beach church next Monday evening. The Union is composed of representatives from all the different Methodist churches in San Diego. Dinner will be served at 6:30 o'clock. The Rev. James E. Dunning, newly appointed district superintendent of the San Diego district, will be the speaker. Special music and community singing. Our friends in Ocean Beach are cordially invited to attend and greet the new superintendent.

CURRENT EVENTS PASS IN REVIEW

REVOLT FLAMES IN GREECE; EX-PREMIER VENIZELOS HEADS INSURRECTION.

By EDWARD W. PICKARD
©, Western Newspaper Union.

THE Greek government is making a grim effort to stamp out the fast growing revolt which started in Crete and has spread to the mainland. Greek government planes bombed the home in Crete of former Premier Eleutherios Venizelos, and also struck at five naval vessels manned by rebels standing off the shore of Crete. Venizelos is openly heading the forces of sedition, and, reports say, has seized $1,000,000 from the Canea treasury to finance the revolt.

Ex-Premier Venizelos

The rebellion has been plotted for a whole year, and broke when 20 naval officers, both active and retired, seized the Salamis arsenal. As the revolt spread, rebels boarded the five warships while the crews were ignorant of the plan, and put under steam. Government planes were dispatched to the scene and pursued the rebel ships down the Aegean sea. The cruiser Averoff was struck by an aerial bomb while the vessel lay in Souda bay, near Crete, and two other ships were reported to have been overtaken and bombed near the Island of Cythera with undetermined damage.

Naval reserves have been called to the colors, and preparations made to call out army classes on the mainland if necessary. Reports that the rebellion has reached Alexandropoulis and other towns in Thrace, and that there had been fighting in Seres, eastern Macedonia, indicate that the revolt is more widespread than was first supposed.

The Greek government searched the Athens home of Venizelos and reported finding arms and compromising literature. Searchers found Deputy Papanastitiu, recently an opposition spokesman, and another Venizelos associate named Caphandaris in hiding there. Military restrictions have been tightened in Athens. All radio stations have been ordered to remain silent, and private automobiles are forbidden to circulate. Courts martial have been opened to try rebels, the bourse is closed, and business is practically at a standstill.

DIMINUTIVE King Prajadhipok of Siam has renounced his throne, relinquished his claims to being known as "brother of the moon and possessor of 24 umbrellas," assumed the simpler, if still unpronounceable name of Prince Sukhodaya, and retired to the simple life of an English country gentleman. By his action, the ex-monarch set a record, for it is probably the first time in history that a ruler has abandoned power because his government rejected his demands for greater freedom and democratic control for his people. "My intention that the people should have a real voice in the policy of the government has been ineffective," the ex-king wrote in his message of abdication. "Since I realize that now there is no longer any way of my assisting or protecting the people in the future, I hereby renounce all rights which I had as king or rights of succession, but I reserve the rights which I had formerly enjoyed before accession to the throne." According to London dispatches the throne of Siam has been formally offered to eleven-year-old Prince Ananda, who is now attending school in France.

FERA is making good with its threats that states which do not do their part in supplying relief funds will not get help from the government. Idaho, Minnesota and Washington were notified that their March allotments were being held back until they come across with the funds demanded; and Wisconsin, South Dakota, New Jersey and Ohio received grants for only half of March, the remainder depending on their agreement to furnish certain additional funds. Aubrey Williams, assistant relief administrator, said all the other states were complying with the demands of FERA.

The relief administration took steps to increase the aid being given the drouth-stricken areas of the Middle West. Administrator Harry Hopkins announced in Chicago that in order to tide farmers "over the next three crucial months" the farm credit administration would raise its feed loans from $6 to $10 a month for each head of drouth cattle.

Hopkins added that previous limits on feed loans and direct advances for feed purchases were being weighed and that "each farmer will be treated as an individual case."

WHO is to be the administrator of the social security program, when and if it is legalized by congress, is a question that is causing a deal of bitterness in Washington. Probably it will ultimately have to be settled by President Roosevelt himself. Secretary of Labor Perkins believes her department should have control of this work, but the house ways and means committee thinks otherwise. It has tentatively decided that the social security board shall be an independent agency, and has turned down a suggestion that the program be administered by a single person. Madame Perkins made a personal call on Chairman Doughton to argue for her proposal, but didn't get anywhere at all with him, so it was figured that she might appeal to the White House.

THE American Federation of Labor proposes to find out immediately what are its chances of fully organizing the workers employed in the automobile industry—and if Doctor Wolman's figures are correct it is likely the federation is doomed to be greatly disappointed. The method adopted is the calling of a secret strike vote among members of the 176 federation locals in the industry. Organizer Francis J. Dillon explained this did not necessarily mean there would be a strike, only the federation's national officers having authority to order such action.

"Now is the time to find out, once and for all," he said, "whether the workers in the automobile industry want the American Federation of Labor. If they want the union, we will find it out through these strike votes. If they don't, well . . ."

The automobile industry is in the midst of the busiest season it has had since 1930. The great majority of its workers are not in the federation ranks and probably would not strike; but its plants could be seriously crippled by strikes in allied industries. Perhaps the American Federation of Labor leaders have some way of explaining how all this would help on the cause of national industrial recovery.

DONALD RICHBERG, executive director of the National Emergency council, and one of the closest advisers of the President, "guaranteed" that there would be no monetary inflation as long as Franklin D. Roosevelt is President. His statement came in answer to a questioner at a lecture in Boston.

Donald Richberg

"If we are to assume that President Roosevelt will be President for the next six years, I can tell you this: I can guarantee there will be no inflation while Franklin D. Roosevelt is President," Richberg said.

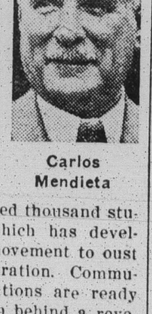
He dodged further discussion of the subject, and refused to comment as to what was being done by the government internationally and nationally on monetary policies. However, Richberg did touch on the Townsend plan for payment of $200 monthly to all persons over sixty. He said:

"If everybody over sixty is to get $200 a month, you can be certain it is going to come out of the pockets of everybody between eighteen and sixty.

"When those under sixty have arrived at the unselfish attitude where they are ready to dig to pay everybody over sixty the $200 a month there will have been a tremendous spread of real Christianity. But the government can't get the money out of thin air."

Richberg flatly denied that the government was issuing baby bonds because bankers had refused to lend the government money, and asserted that several billion dollars more could be borrowed without endangering national credit.

INTERNAL troubles continue to rock Cuba, and President Carlos Mendieta's regime appears tottering. Manuel Despaigne, the only member of Mendieta's cabinet who was in office, has resigned as secretary of the treasury, completing the rout of the ministry brought about by the school strike. And twelve assistant cabinet secretaries have also deserted the administration.



Carlos Mendieta

The cabinet resignations began over differences of opinion as to how to deal with the strike of several hundred thousand students and teachers which has developed into a national movement to oust the Mendieta administration. Communist-led labor organizations are ready to throw their strength behind a revolutionary general strike, and the situation is becoming critical. Although armed forces are being held in readiness to quell disorders, there is some doubt as to their loyalty to the president. Col. Fulgencio Batista, army chief of staff, was reported ready to throw his support to Dr. Carlos Manuel de la Cruz for president if the Mendieta government falls, but leaders of the anti-Mendieta movement have indicated Batista's choice would not be acceptable to them.

Terrorism continues rampant. Bombing has become general, railroads have been blown up, and Havana has suffered considerable damage to property.

SECRETARY OF STATE CORDELL HULL encountered his third success in carrying out his policy of restoring foreign trade by concluding a series of reciprocal agreements with other nations, when a trade treaty with Belgium was signed. Although not entirely satisfactory to Secretary Hull, it was nevertheless a step along the way. The Belgians gave us a tariff or quota concessions on a number of our exports, including automobiles and parts, calculating machines, radios, grapefruit, pears, oatmeal and corn starch. We cut tariffs on plate glass, glass sand, iron and steel mill products, linen fabrics, lace and cement. Reciprocal agreements have been previously concluded with Cuba and Brazil.

PRESIDENT ROOSEVELT ended his vacation at Hyde Park and left for Washington where his administration faces serious trouble, involving the prestige of the White House. Capitol Hill is full of lively curiosity over the President's program, and whether he will fight the present congressional defiance of his leadership and go before the people with one of his famed fireside talks, or whether he will agree to a compromise. Mr. Roosevelt at the end of his second year in office faces a predicament in his relation to congress similar to that which confronted Mr. Hoover in 1931.

Sen. Wagner

Unless he regains control his entire program is likely to bog down. The fight hinges on the $4,880,000,000 work-relief program, the first item in the President's budget message and the principal mainstay of his program. Secret conferences at which slices of pork were reported to have been dangled before the avid eyes of revolting senators were said to have been held. A few supporters of the McCarran prevailing wage amendment which wrecked the bill and forced its recommission to the appropriations committee were said to be wavering under the pressure. Senator Robert F. Wagner, who voted for the amendment, acted as peacemaker. He intimated the possibility of a compromise by paying more than the so-called security wage of $50 a month, but still lower than the prevailing rates. Other leaders declared they would not budge from their positions.

Secretary Ickes has been no help to the President in quelling the revolt. In his recent testimony, Ickes was reluctant to tell a senate committee about allocation of $238,000,000 for a naval shipbuilding program. The senators finally pried out information which would indicate that the navy and the speculators knew all about the appropriation, but none of the members of congress knew about it. The money was to be spent at executive discretion, and senators feel this does not augur well for the proposal to hand to Mr. Roosevelt unlimited power in spending the proposed five billion dollar appropriation.

Since next year will bring another Presidential election, a third of the senators will be up for re-election, and all of the house members. They are watching closely the present situation because, if the President is slipping, they want their own records back home in good order.

THE Blue Eagle lost another tail feather the other day, when Federal Judge Nields at Wilmington, Del., held that the collective bargaining provision of NIRA is unconstitutional when applied to companies not engaged in interstate commerce. The administration and organized labor immediately joined in a fight to preserve the validity of Section 7-A, and announced that an immediate appeal would be taken before the United States Supreme court.

The Wagner labor relations bill making Section 7-A the law of the land and outlawing company unions may have to be revised, if Judge Nields is upheld by the high court. The ruling also gives support to opposition now forming in congress against extension of NRA unless it is reorganized.

Judge Nields' ruling was on an injunction suit brought by the government against the Weirton Steel company to enjoin the steel firm from alleged violations of Section 7-A of NIRA and the labor section of the fair competition code of the iron and steel industry. He upheld the right of employees to form company unions for collective bargaining, thus upsetting the claim of the Amalgamated Association of Iron, Steel and Tin Workers, that the company intimidated employees and dominated the company union. The court held that the company is primarily engaged in state, not interstate commerce, which congress is not empowered to regulate. Judge Nields stated:

"Power to enact Section 7-A was not conferred upon congress by the 'general welfare' recital in the preamble of the Constitution, nor by the welfare clause, Article 1, Section 8, of the Constitution."

Unless the Supreme court reverses Judge Nields, the decision will prevent the New Deal from interfering with employee-employer relationships of a vast majority of American business.

New Deal policies received another jolt the same day when Judge Charles L. Dawson on application of 35 western Kentucky coal operators issued a writ enjoining the government from enforcing the bituminous coal code, reaffirming an earlier decision that the national industrial recovery act was unconstitutional. Judge Dawson declared that the coal mining is an intrastate business, and beyond the power of congress to regulate.

THE United States and Great Britain remain unconvinced of Japan's high purpose in China, although Eiji Amau, foreign office spokesman, declared that Japan is not trying to persuade China to leave the league, and is not urging China to dismiss foreign advisers. He also insisted that no attempt is being made to force China into an Asiatic bloc in return for financial assistance. In Washington, William Phelps, acting secretary of state, and Sir Ronald Lindsay, British ambassador, went into conference. Twenty-four hours later it was announced from London that Great Britain together with the United States, France and Japan was "exploring proposals" to help China financially.

Mussolini Shouts Defiance at Europe

1.—Italian reservists answer call to colors. 2.—Narcotics valued at $15,000 were seized and nine Chinamen arrested in a raid by narcotic agents at San Rafael, Calif. 3.—John Edward Bradley of Altadena, Calif., announced by President Roosevelt as winner of the Mount Rushmore Memorial inscription competition.

Huge Army Now Ready, Says Il Duce

Eight Million Men Can Be Put in Field

Premier Mussolini hurled defiance at Italy's foes with the announcement that he could place 8,000,000 under arms, and chancelleries of Europe were thrown into a furore.

War preparations have been going forward steadily, with conscripts arriving at mobilization centers as shown above. Five thousand men have already left for Italian Somaliland where trouble threatens with Ethiopia.

Mussolini's statement was seen as a warning to Germany that although a force might be engaged in the Ethiopian border dispute, Italy was prepared to brook no Nazi interference with Austria. European newspapers have freely predicted trouble between the reich and Italy, and some have thought that Hitler might be planning to take advantage of the dispatch of Italian troops to Africa to attack Italy in the belief that its defenses were thus weakened.

The signed communique stated: "However, it must be remembered that by virtue of recent laws Italy can mobilize thirty-seven classes, numbering eight million men, between the ages of eighteen and fifty-five."

His brusk communique was issued as the transport Leonardo Da Vinci loaded additional troops from the Peloritana division at Messina, Sicily. The Leonardo Da Vinci, delayed by bad weather at Messina, sailed for east Africa at night with 110 officers, 1,200 infantry and artillery troops, and 300 skilled workmen. Loading of materials on the Arabia was begun at Naples. The supply ship sailed the following day.

Mussolini said the modernized, military organizations of Fascist Italy can rush thirty-seven classes into uniform should war come. Intensive recruiting is provided for in new Fascist law involving military training for all citizens between the ages of eighteen and fifty-five. While troops are being sent forward from Italy, prospects of future trouble was somewhat lessened, observers claimed, after Sir John Simon, British foreign secretary, declared to the house of commons that Italy was still bound by treaty to respect the territorial rights of Ethiopia. He said that all the trouble was caused over indefinite boundaries.

YOUNGEST BISHOP

The Most Reverend Raymond A. Kearney who recently was consecrated auxiliary bishop of the Brooklyn diocese. Bishop Kearney, aged thirty-one, is the youngest member of the hierarchy in the world.

Wins Prize in Rushmore Competition

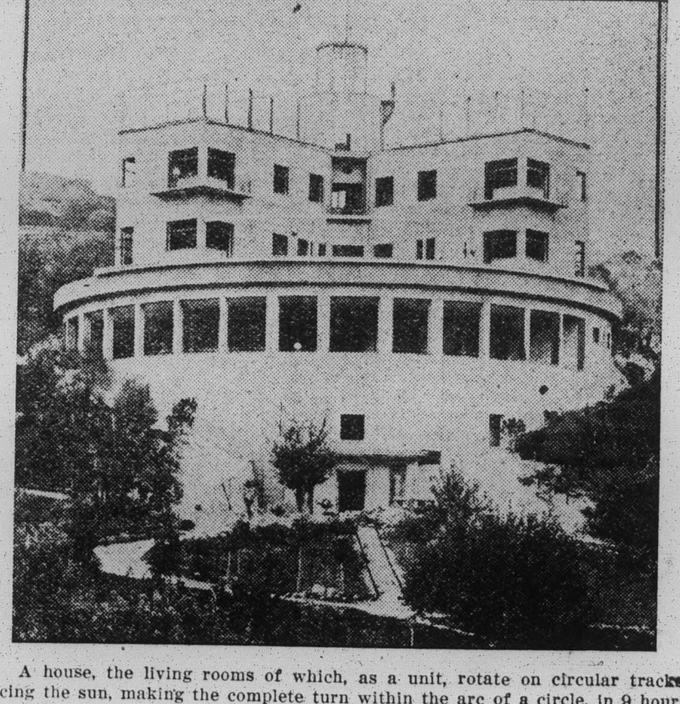
Writes Text for Huge Monument

John Edward Bradley, Altadena, Calif., who won the prize for the best inscription to be placed on the Mount Rushmore National Memorial, is shown above. The heroic Black Hills monument to four immortal Presidents will be completed in 1937, according to A. E. Demaray, associate director of national parks.

Last year the sculptor, Gutzon Borglum, put finishing touches on the majestic countenance of George Washington, and completed that of Thomas Jefferson, author of the Declaration of Independence.

On passage of an Interior department bill now pending, congress will have appropriated $245,000 of the $250,000 authorized. Meanwhile private contributors have donated only $145,000 of the $250,000 expected from them.

A "Sunflower" House in Italy



A house, the living rooms of which, as a unit, rotate on circular tracks, facing the sun, making the complete turn within the arc of a circle, in 9 hours and 50 minutes. The motive power comes from a 3 horse power engine which operates in the center of the house. The house shown is located on a hillside in Italy.

YOUNGEST PREACHER

Charles E. Jaynes, aged five, for more than a year has been conducting evangelistic services throughout the country. He is ambitious to become the world's greatest preacher. He is here shown at the Angelus temple in Los Angeles.

"Snowmocycle" Makes Its Appearance

Doctor Riemerschmid, of Munich, with his special snow-bike, which really might be called a "snowmocycle," specially constructed for swift traveling through high piled snow drifts. The rider wears skis to maintain the balance of the machine which is motor driven. The machine seems to have trac tor wheels.

The Man From Yonder

WNU Service.

THE STORY FROM THE BEGINNING

Ben Elliott—from "Yonder"—arrives at the lumbering town of Tincup, with Don Stuart, old, very sick man, whom he has befriended. He defeats Bull Duval, "king of the river," and town bully, in a log-birling contest. Nicholas Brandon, the town's leading citizen, resents Stuart's presence, trying to force him to leave town and Elliott, resenting the act, knocks him down. Elliott is arrested and finds a friend in Judge Able Armitage. The judge hires him to run the one lumber camp, the Hoot Owl, that Brandon has not been able to grab. This belongs to Dawn McManus, daughter of Brandon's old partner, who has disappeared with a murder charge hanging over his head. Brandon sends Duval to beat up Ben, and Ben worsts him in a fist fight and throws him out of camp. Don Stuart dies, leaving a letter for Elliott "to be used when the going becomes too tough." Ben refuses to open the letter, believing he can win the fight by his own efforts. Fire breaks out in the mill. Ben, leading the victorious fight against the flames that threatened to win the fight for Brandon, discovers the fire was started with gasoline. Elliott gets an offer of spot cash for logs, that will provide money to tide him over. But a definite time limit is set.

CHAPTER V—Continued

—9—

"I saw your trail. That is, I . . ." How different, this beginning, from the manner of address he had planned! He felt called upon, now, to explain his presence on her trail rather than to demand a reason for her being there. "I saw your trail," he began again, "and I thought . . . It seemed to me you might be a little lost."

"As a matter of fact, I am completely turned around," she said. "It was silly of me to come into the woods, especially on a day like this, without a compass. But I did . . . and here I am!" She was eyeing him closely now, as though searching for some special detail of face or figure.

Lost! He thought: a lost Diana!

"I kept losing my bearings and had trouble getting oriented and am getting a little tired. It was so silly! Downright stupid! If you know this country you can set me right. I should be back in Tincup before long or they'll worry."

Ben wondered quickly and irrelevantly, who They might be. Yes, he could get her out. In a half hour he could have her in his camp and send her on her way to town. . . But in a half hour . . . And with her manner so clearly hostile for no reason at all? . . . She impressed him as a young woman most desirable to know well and also as one whose confidence would be slow in acquiring.

"Lost, eh?" he asked and laughed oddly. "Matter of fact, I came out without a compass myself." That was truth. He needed no compass for a short swing such as he had made today; his sound woodsman's instinct would hold him safe.

"Well, that complicates matters," the girl said drily. "I've got to get out of this timber and I'm not good for much more travel in this sort of going. I haven't been on webs in several years and I've gone further than I should have."

"By George, that's too bad!" he said and hoped that none of his men, who would be trekking into camp by now, would shout or sing so their voices would break down the illusion of empty distances surrounding them which evidently possessed the girl. "Too bad! It's getting dark sure enough but it isn't very late. If you could sit down and get your wind, now—"

"But what good will that do? If we stay here until it's really dark there may be no getting out until morning. All I have with me is a cake of chocolate and the prospect of a hungry, cold night in the woods with you isn't alluring."

Ben rubbed his chin.

"I'm sorry. If the impression I make is as bad as—"

"I meant nothing personal. But I don't know you. I don't fancy being lost with anyone, let alone a stranger."

He thought she almost smiled, as if relenting a bit from her brusqueness.

"Look!" he said, pointing aloft to where a break in the clouds near the zenith let about the last of the daylight through. "It's going to clear. We'll have stars directly. Let me build a little shelter and a fire here. A few minutes of rest will do a lot of good and with stars we can get anywhere."

She hesitated, seeming to consider.

"All right, I must admit the last half hour's going has been hard."

Out came his belt ax, off went the lower limbs of young hemlocks. In less than it would take an ordinary man to lop the branches he had a bench of trampled snow on a knoll covered with aromatic boughs and a thick windbreak of them behind it. Then, attacking a huge birch stub he peeled off a quantity of lose bark. This he lighted from a match carried in a tightly corked bottle and as the quickly burning stuff shed a comfortable glow on the bower he had built, he knocked dead branches from a hemlock, fed them to the flame and then turned to a nearby dry top of a fallen maple, knocking off substantial faggots.

By the time he finished this the girl had shaken off her snowshoes, stuck them on end in the snow and was sitting on the couch he had built for her.

She eyed the fire as he stood erect, drawing off his gloves and spreading his big hands to the warmth.

"Strange," she said, "that you should be lost. From the way you make yourself comfortable in the woods I'd say you'd been born in timber."

"From the way you know woodcraft when you see it, I'd say it's as strange that you should be lost!"

"What I know of the woods was learned years ago. One gets rusty. I've discovered. Who are you and what are you doing here?"

Her directness quite took his breath.

"Well, my name's Ben Elliott, if that means anything to you. And I was looking for somebody who has no business to be here. Who are you and what brings you into this timber?"

He was bound, now, to break through her aloofness.

"That," she replied, however, "is largely my own affair. But, Mr. Elliott, if you should guess that I was simply trying to lose a certain unpleasant mood in the woods where I once was quite happy, you wouldn't be far from right."

She spoke incisively and unhesitatingly but it seemed to him that behind this brusqueness was something quite different: something he could not fathom. He was about to remind her that she had not yet revealed her identity when she went on:

"Looking for someone who has no business here, you said. Just who are they, what are they doing?"

"As to the first, I can't tell you. For the second, their purpose probably would be to attempt to hold up a timber operation in which I'm rather interested not so far from here."

Her eyes were on him with a curious expression, which might possibly have been personal interest.

"To hold you up? How?"

"Are you from Tincup?"

"I am."

"You know people there? And what seems to be the town's most famous tradition?"

"I don't understand."

"Isn't it that Nicholas Brandon finishes what he starts out to do? That whatever he says goes, come what may?"

Her eyes dropped.

"I've heard that said. People like to talk."

"Right! But I'm managing an outfit that's encouraging rough going from some source. All sorts of things are happening and I'm trying to head off certain of them."

"I see."

She looked away and puckered her delectable lips as though to whistle. Ben rubbed his chin again. She was not even interested in learning more about him, but where many young men would have been piqued at that he only laughed softly.

"What's the joke?" she asked, almost defiantly.

"I was just thinking that it's a funny situation when a man gets into a scrap and it looks so big to him that he thinks the whole darned country must be watching it and him; and then along comes a nice girl who's been in a position to hear all about it and who isn't interested a dime's worth."

She looked up at him slowly.

"You mean that you want to talk about it?"

"Perfectly natural that I should. I'm in one whale of a fight and having the time of my life. It's the first job I've found in a coon's age that was hard enough and complicated enough to be worth working over."

"That's what I've heard about you."

"You've . . . Oh, so you have heard about me?"

"Of course, I live in Tincup. Few have any secrets in a town of Tincup's size."

Ben chuckled again.

"Well, then, if you've heard that much about me and my job, maybe there isn't anything I could tell you that would be interesting."

"Maybe not," she said with an air of dismissal.

Ben watched her closely as she slowly broke a twig to bits with her slim fingers.

"Deer used to yard in the swamp back of here," she said. "When I was a little girl I used to come out and try to make friends with them. That's why I came out today . . . wondering if they'd started to yard yet."

"It's too early for them to yard."

"Yes, but the snow may get deep enough any day to bunch them."

"Snow!" he said and shrugged. "If it gets deep in a hurry the deer will yard all right and, maybe, I'll be licked and a little girl done out of all she has in the world."

"All she has in the world? Meaning just what?"

"If you live in Tincup and know the town you must know about the owner of this property. This is the Hoot Owl timber."

A queer smile twitched at the girl's lips.

'Sometimes I think I do; as often, I wonder what she's like . . . really like. I happen to be Dawn McManus."

Ben Elliott opened his mouth as if to speak. Then closed it again and made a foolishly helpless movement with one hand. He stared at her and began to stammer

"Why I . . . Why, you . . . Why, Able said! . . ." He laughed outright, then, as his misconception became clear. "Oh, if I'd given it a second thought I'd have known! Able first told me about you as a little girl. It stuck in my head; a little girl! But that was years ago, of course. . . . Gee! . . . Why, then you're lost in your back yard, as you might say."

"I was," she corrected. "But a few minutes ago I heard some one sing out; and just now the cook called the crew to supper."

"Then why didn't you—"

"Because I was rather curious to discover what sort of man is standing between me and poverty,"—perhaps ironically, this. "And, of course, I knew you weren't lost."

Elliott flushed on that.

"I played at being lost myself so I'd have a chance to talk to you. I'm glad I did . . . unless it has offended you."

"No. I'm . . . I'm only ready to go in, now."

She adjusted the harness of her shoes dexterously and they set out. On the way to camp Ben tried to talk to her further but her responses were brief and non-committal. Her interest appeared to be only poorly aroused even on such a vital matter as the operation of her property, and so finally he gave up trying to make talk and broke trail thinking that now the job would have an added zest, that a girl like Dawn McManus was an ever greater incentive than the thought of a small child, alone, with her timber at the mercy of hard schemers, and depending on him to make safe her heritage.

In camp Blackmore, the veneer buyer, was waiting for Ben and after eating silently in the cook shanty with those two Dawn set out for Tincup with Blackmore, leaving Ben with considerable to think about besides revamping the mill and getting out choice logs.

CHAPTER VI

The new piston head for the locomotive arrived and Elliott was at the station when the train bearing it pulled in. More, he was close beside the express car when it halted and carried the part himself to his waiting sleigh.

The veneer logs were ready to come out to the siding. Standard cars had been set off at Hoot Owl that day. To-

"The Pool Room's a Good Place for You to Be, Limpy."

morrow, bright and early, they would start loading and by night his contract with Blackmore would be filled. He would receive a large check, a substantial part of it clear profit, in return.

His men were growing restless under the driving; whispers in camp had it that the job was broke beyond repair and he knew that to pass a pay day would send his crew scattering, a handicap which he could never overcome in time. But with the men held on the job and the mill ready to saw in another week he would be ready to give the Hoot Owl a fresh start, a new hold on hope.

After reaching camp he plunged into his blankets for a night's rest.

And about the time he burrowed into the pillow Nicholas Brandon sat in his office talking to a pale, slender young man whose blue eyes smiled genially. Genially, yes, but in that quality was a flaw, one might have observed on close scrutiny. Familiarity with Limpy Holbrook might not breed contempt; but surely, in an alert man, it would stir an awareness for the need of caution soon or later.

Brandon now nodded slowly.

"All right. Don't start until dark. And do just as I've told you; don't forget to give yourself plenty of time. You can't travel fast."

"I get you, Mr. Brandon."

"Have you . . . That is, has he ever seen you?"

"He came into the pool room and I sold him tobacco the other day. We visited a minute."

"Friendly?"

"Nothing but!" The open smile had the cast of a leer as Holbrook made reply.

"The pool room's a good place for you to be, Limpy. Great center for news. Well . . . You keep on reporting everything that's said there. . . . Good night."

Holbrook limped out and Brandon, alone, puffed for a time on his cigar. Next, he opened a lower drawer and drew out a bottle of whisky. Only one drink remained in it. He frowned. A year ago he had procured that liquor; for nearly twelve months it had been scarcely touched. But since the night that old Don Stuart died its contents had been drawn upon frequently. His hands shook a bit as he lifted the bottle to his lips, now, but after drinking new strength began to surge through his body and he smiled. He looked at his watch after a time and then out into the street. After a time he rose and walked to the wall telephone.

"Give me Miss Coburn's house, will you?" he asked the operator. "Hello! Miss Co— Ah, Dawn! Its Uncle Nick talking. Want to go to the movie tonight?"

She seemed to hesitate and he tilted his head sharply, lips parted. Then her voice came.

"It's nice of you to think of me, Mr. Brandon. But I don't think I care to go with you tonight."

"Oh; sorry," he said genially enough but his brows gathered. "Another time, then."

"Perhaps."

Her receiver clicked up and he turned away from the instrument scowling thoughtfully.

"Mister Brandon, eh?" he said softly. "And . . . No excuse. . . . Well!"

The last word was spoken with a snap, as though a chapter were closed.

He paced the floor slowly. He was brooding, planning, and by the look on his face it was evident that he planned good for no man . . . except, possibly Nicholas Brandon.

Perhaps he was thinking of the matter that was to confront Ben Elliott within twenty-four hours.

That young man was in high feather as the crew came in to supper. His locomotive had shunted the standard cars up from Hoot Owl before daylight and the veneer logs scattered along the steel had commenced going up at once.

Able had come driving out from town in mid-afternoon, Dawn beside him, and with an added thrill because of her presence Ben directed the loading of the last car, conscious that the girl's eyes were often on him with an expression which belied her apparent indifference when he tried to engage her in conversation.

It was dark when the jammer man swung the last log into place and toggles were made fast. Able and Dawn rode with Ben in the locomotive as they trundled down the track to camp.

"You boys have had a long day," Ben said to the engineer and fireman. "It won't get any darker. You eat your suppers here and we'll run 'em in this evening."

He turned to Able.

"Our contract calls for delivery in time to meet the local. She's been coming through a little before eight in the morning. Want to take no chance of having this stuff held up now. That would be a tough break!"

TO BE CONTINUED.

Serbia Always Markets Brides Through Broker

Many of the younger Serbians wish elders would abolish the custom of buying and selling brides, but the older generation can't see it that way. And the authorities are helpless to stop the practice, too, because negotiations between the parents involved are carried on in secret by a marriage broker, called the storjnik, and no one is wiser until it is settled.

The supporters of the old order claim they are put to great expense in rearing their daughters, and it is only right and fair that the bridegroom should pay for the added help he thus obtains for his household in taking a wife.

Prices vary greatly in this Serbian bride market, some fetching as high as 30,000 dinars (about $600), others as low as 2,000 dinars. A bride's worth is measured by her health, strength and knowledge of farm and household affairs. Beauty is a secondary consideration, but should the prospective wife possess it her value is enhanced.

In many instances when a suitor has been too poor to pay the price asked by the girl's parents, he has abducted his bride with the aid of friends. And as only the spilling of blood can wipe out the deep humiliation and disgrace of having a daughter "snatched," feuds lasting through generations have in this way begun.—Pathfinder Magazine.

Foot-Worm Disease

The malady which has been termed a foot-worm disease, is an infection of the feet by a thread-like, white nematode worm known as the onchocera flexuosa, which sometimes reaches a length of 10 inches, says the Detroit News. These parasites are found extended in the subcutaneous tissues, and, in advanced stages, coiled in cysts near the surface. Deer afflicted with this malady usually have inflamed and swollen feet, are often notably lame and in some cases the hoofs may even be loosened.

Let Our Motto Be
GOOD HEALTH
BY DR. LLOYD ARNOLD
Professor of Bacteriology and Preventive Medicine, University of Illinois, College of Medicine.

DIET IN RELATION TO COLDS

The more we study diet and nutrition, the more we are convinced that many health problems can be best corrected by diet. More and more we are coming to believe that we are what we are as a result of what we eat.

Our whole body is enclosed in an epithelial tissue membrane. At places it is dried and thickened to protect us against friction, as the skin. At other places it is a thin moistened layer as in the nose, mouth and throat. Many people do not think of it this way, but the lining membrane of the air tract, the wind passages and the lung cells, are really body surface coverings.

The lining of the digestive tract is likewise another body surface covering. Considered as such, the contents of the digestive tract are outside of the body. The body surface selects from the food that we send to the digestive tract by way of the mouth, the substances it needs.

Obviously, if we do not give it the right materials to work upon, the body cannot have its maximum efficiency. A body that is not given the right food can never be as efficient or healthy as the body that has the right "stoking."

In many experiments, which we have been conducting in our medical research laboratories, we have found that one of the very important functions of this body surface covering, whether it is the outside skin or the lining of the breathing tract or the digestive tract, is to prevent the invasion of bacteria. Healthy skin has a marvelous power for disinfecting itself. When germs land on healthy body surfaces, they are promptly and efficiently destroyed.

You can, for instance, place millions of germs on the skin of your hand or any other part of your outside body surface, except under your finger nails, and the line where the outside skin and the lining membrane meet at your mouth, your nostrils and around your eyes, and if the skin is clean the germs will disappear of themselves within a few minutes.

You can likewise breathe in many germs and swallow many germs without being affected in any way, providing the lining of the breathing tract and the lining of the digestive tract are in good healthy condition. But if the mucous lining is inflamed or "sick" in any way, then the affected part loses its self-disinfecting power, and bacteria gain an easy entrance to the body.

Man is an omniverous animal; that is, he is a meat and vegetable eater. The anatomy and the physiology of his stomach and intestinal tract show that he has developed through untold generations upon a mixed diet of meat and vegetables. A good big beefsteak makes us feel good. We secrete more gastric juice after eating a meat meal. We use more oxygen per unit of body weight after a beefsteak than after a vegetable meal of the same theoretical heat-producting units. In other words, our habits of eating three times the amount of animal proteins necessary to replace our daily loss of these substances has a sound scientific basis. We are unconsciously stimulating ourselves. This is healthful.

The American public has been made vitamin-conscious as a result of the advertisements appearing in the press. Vitamins are grouped into two big classes, those promoting normal growth and those aiding us in maintaining health after adult age has been reached. We cannot always separate these two classes of vitamins from a public health standpoint. These substances have been eaten along with energy producing and protein replacement foods for so many centuries that man has become so accustomed to these accessory materials he cannot do without them. They are the lubricating agents of our complex interacting body machinery.

We have found in tests which we have made in our research laboratories that an unbalanced diet, that is, one in which necessary vitamins are absent, causes these lining membranes of the breathing and digestive tracts to lose their power of destroying bacteria. Then germs can invade us because our defenses have lost their ability to defend.

In tests which we have been making in the last three years, we have learned that most of the people who suffer from frequent head colds eat too much starchy food. They do not get enough of the health-necessary vitamins. They should cut down radically on the amount of bread, pastry, and sweets they consume and eat generously of cooked vegetables and of salads and green vegetables, and of all fruits in season. Soups of peas, beans, asparagus and celery are especially recommended. Two full glasses of orange juice a day are good medicine for chronic cold sufferers. The cheaper tomato juice, however, is just as healthful. And the inexpensive cabbage is mighty good food.

Odd Remedies Used

Toasted hawk, monkey's head, dried newts, and baked sparrow are some of the primitive "cures" still to be procured in some chemists' shops in Tokyo.

EVIL IS CONTAGIOUS

There is no sort of wrong deed of which a man can bear the punishment alone: you can't isolate yourself and say that the evil that is in you shall not spread. Men's lives are as thoroughly blended with each other as the air they breathe: evil spreads as necessarily as disease.—George Eliot.

Week's Supply of Postum Free

Root of Justice

Where doth justice dwell? First, in the conscience.

CONSTIPATION Can be Helped!

(Use what Doctors do)

Why do the bowels usually move regularly and thoroughly, long after a physician has given you treatment for constipation?

Because the doctor gives a *liquid* laxative that can always be taken in the right amount. You can gradually reduce the dose. *Reduced dosage is the secret of real and safe relief from constipation.*

Ask your doctor about this. Ask your druggist how popular liquid laxatives have become. The right liquid laxative gives the right kind of help, and the right amount of help. When the dose is repeated, instead of more each time, you take *less.* Until the bowels are moving regularly and thoroughly without any help at all.

The liquid laxative generally used is Dr. Caldwell's Syrup Pepsin. It contains senna and cascara, and these are *natural* laxatives that form no habit—even in children. Your druggist has it; ask for—

Dr. Caldwell's SYRUP PEPSIN

Christian Science: A Practical Religion by Rev. Irving C. Tomlinson, C. S. B.

A Lecture on Christian Science

by

Rev. Irving C. Tomlinson, C. S. B. of Boston, Massachusetts

Member of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist in Boston Massachusetts, delivered a lecture entitled, "Christian Science: A Practical Religion," under the auspices of Sixth Church of Christ Scientist, San Diego, Ocean Beach.

The lecturer was introduced by Mrs. Margaret T. Taylor who spoke as follows:

In Jeremiah 33:3 we read "Call unto me, and I will answer thee, and show thee great and mighty things, which thou knowest not." Christian Science has been given to us to teach us these great and mighty things and this understanding comes through the study of the Bible and Science and Health with Key to the Scriptures by Mary Baker Eddy.

I have had many wonderful proofs of this demonstrable religion and we are here today to hear more about this Science, which teaches us that God is everpresent.

It now gives me great pleasure to introduce to you Rev. Irving C. Tomlinson of Boston, Mass., a member of the Board of Lectureship of the Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts.

The lecturer spoke substantially as follows:

There is an outcry today from a suffering world for salvation. This cry was answered twenty centuries ago by Christ Jesus: "Ye shall know the truth, and the truth shall make you free." Christian Science comes today in his name with an assurance that the promises will be fulfilled. Christian Science teaches us that whatever the need, there is always divine Love enough present to save from any affliction, always Truth enough to destroy any error, always divine intelligence enough to point the way out.

May I tell you briefly of my own introduction to Christian Science? I had been for five years the pastor of a church in a suburb of Boston. In my pastoral work I was instrumental in sending a drunkard to a gold cure. After being there for some time he came home and remained sober. One of the church members said to me, "If you had never done anything more than to reform this man you would have justified your calling." In reading the Bible that evening my eyes fell on Jesus' command to his disciples, "Go . . . , preach . . . heal." I wondered if there were a church which understood both commands. Then I began to look for such a religious society. I visited churches of many denominations and finally began attending the Wednesday night meetings of the Christian Science church in Boston. When I heard the testimonies of healing that were given, I said, "What other people are talking about, these people are doing." Since that time I have had countless opportunities to witness and prove the healing power of Christian Science.

TODAY'S URGENT PROBLEM

The urgent problem of today is the solution of the uncertain and unsettled state of affairs in the economic or business realm. We all know that there is just as much land and air as there ever was; just as much food (in fact, an overabundance of food); just as many willing hands to go to work—and still there is this lack.

As there is this abundance of material supply, what is the trouble? Obviously it is not in the matter condition, in the material situation. Where, then, is the trouble found? Is it not in the mental realm? Can't we see that all lack is a mental condition? Mankind is experiencing the results of corruption, greed, materiality, prior to its purification.

Never has material knowledge reached so high a point, never have the achievements of the human mind been more brilliant, more triumphant, than in this era, tending toward annihilation of time and space. One can be in New York and hear Big Ben of London strike the hour of midnight, or converse with an explorer in the polar regions. Flying, television, broadcasting, a thousand and one improvements, increase the comforts, the conveniences and pleasures of mankind. All these inventions we welcome, and rightly so, yet observe well; the high tide of the victories of all this material knowledge is concomitant with one of the greatest periods of disaster in history. In the midst of its greatest triumph, materialism lies prostrate, in a great defeat. It is a paradox that the more victories we win on the false basis of life in matter, the more defeats we undergo. The whole picture paints the self-contradictory nature of matter—the stronger it seems the weaker it is.

There are, however, signs of awakening. Many students of world affairs, including statesmen, natural scientists, and economists, are admitting that the only solution for the world's problems lies in spiritualization of thought, in right thinking and right living. Doctrines no less than theories of economics are being weighed in the balance. More and more is there a longing for a practical religion.

Today, Christian Science, as discovered by Mary Baker Eddy, offers a solution for the problems not only of the individual, the home, and the church but of the counting room, the factory, the farm, indeed of the governments of the world. Christian Science is teaching that Paul's words to the Philippians state a present-day fact: "My God shall supply all your need according to his riches in glory by Christ Jesus."

Someone may ask, How can the understanding of God's omnipotence and the real man's completeness fill my human mouth with material bread, put material coin into material pockets, and supply warmth by material raiment? This better condition, then, is brought about through a better understanding of the truth of being.

Christian Science, which is the application of divine Science in human history, makes this plain. This Science teaches how divine law, operating in the material realm, quenches material sense and so-called law, and supersedes them with spiritual sense and spiritual law, controlling human conditions by understanding the unreality of matter and the actuality of spiritaul law, thus displacing error and replacing it with truth.

SUPPLY UNLIMITED

It is vital to understand the teaching of Christian Science that God, Spirit, is substance. Real substance, as God knows substance, is not to be thought of in terms of bulk, weight, quantity, something that can be weighed or measured. How do we count our substance? In an incorporeal universe what is substance? Eternal, true ideas. It is impossible to outline substance in any material form for substance is above material sense. Since God is not material is it not plain that God has no bulk, nor weight, nor any other property of matter? Must not the same be true of His image and likeness, man? Man's being manifests all the qualities of Spirit, of Life, Truth, and Love.

And what are the qualities of Spirit? Love, peace, power, spiritual consciousness, spiritual understanding. Whatever we know of these qualities is our foretaste of heaven, and what we know we shall never lose. The moment we accept matter as a substantial reality, that moment we have bulk, weight, quantity, and mass; that moment we have limits; that moment substance is something which can be withheld from one and given to another. Then our possessions are uncertain, insecure. The more that substance is viewed as quantitative and finite the less one's substance becomes and the more inevitably mortal man and his universe are progressing toward the logical outcome of limits and finity, namely, annihilation of everything, including his own false views. But the true view of substance works the other way. Everyone can have all there is of substance. All spiritual substance, activity, spiritual consciousness, spiritual understanding, intelligence, truth, love, etc., ever increasing in vigor, action, animation, fruitage, possession, supply, come to him who has the right understanding of substance.

Mental penury is devoid of all reality. Mental penury is the absence of spirituality, the absence of Christ, Truth. It is the absence of the Golden Rule, of justice and mercy in the government of nations; the absence of peace and unity among peoples. The absence of spiritual brotherhood is externalized in the world today.

Jesus once said to his anxious parents, "Wist ye not that I must be about my Father's business?" No other enterprise than the Father's ever concerned Jesus. His capital was the substance of Spirit; his salesmanship the dispensing of Truth; his wares were Mind's ideas. He proved that production comes only from Spirit; that "the flesh profiteth nothing": and he reaped the abundance of good.

In his prayer that he may be always about the Father's business, each sincere follower of the master Christian may realize for himself that God directs all his ways. All the qualities of God belong to him by the law of reflection, and he can make them manifest in his daily living. Thus he can continuously win the victory of Truth and Life eternal.

GOD IS ALL AND IS SPIRIT

Christian Science is old in that it is a restatement of the divine Science of Mind which was in some degree given by the patriarchs and prophets and which was seen and lived by Christ Jesus. It is new in that it explains the divine Principle in obedience to which Jesus did his mighty works. The textbook of Christian Science, "Science and Health with Key to the Scriptures," is in very truth what its name proclaims it to be, a key to the Scriptures. You will recall that Jesus without the use of material remedies, healed the sick and raised the dead, that he fed the hungry and found a supply for every need. Christian Science is reminding man of Jesus' promise, "He that believeth on me, the works that I do shall he do also." It is making men realize that it is their privilege and their duty to carry on the healing work of the early Christians, and it is showing them how to do so.

Scholastic theology has taught the infinity of an all-powerful God. It taught an infinite power, but at the same time inculcated fear and terror of other powers. But any admission of evil as real cannot be included if we stand on the premise of an infinite power which is good. For evil within God's universe denies God's supremacy as an infinite power of good. Evil outside His universe denies His infinity and His omnipresence. The Christian Scientist declares in absolute earnestness that the omnipresence and infinitude of God is a fact; and, if the testimony of the senses presents the contrary, the Christian Scientist denies the evidence of the senses and accepts what is absolute and true. Right at this point demonstration begins to operate in the destruction of sickness, sin, and want. Scholastic theology presents the divine, supreme law of God and then adds laws of health and sickness. Its interpretation of Scripture is that God is All and is Spirit, but it adds to this allness corporeality and matter; while the Christian Scientist asks, If God is Spirit and includes all, what and where is matter?

Today natural scientists would probably answer that matter is the subjective condition or manifestation of energy. More than fifty years ago Mrs. Eddy startled the world by her teaching of the unreality of matter. On page 293 of her textbook, "Science and Health with Key to the Scriptures," is this statement, the significance of which the world is beginning to learn: "Matter and mortal mind are but different strata of human belief. The grosser substratum is named matter or body; the more ethereal is called mind."

OMNIPOTENT MIND

Since God is Mind, and God is infinite, and one, it follows logically that God is all the Mind there is, and there can be but one Mind. This Mind is all-seeing divine Love. It knows only good, only the things of Spirit. It includes no consciousness of loss, of sin, or of disease, for these are but products of a belief in another mind, in a power apart from God. The activity of Mind is always in the realm of perfection. Transformation, not annihilation, is the result of this activity.

Where divine Mind is, ignorance is not. Intelligence is the essential quality of Mind. Each idea of God is an expression of Mind and therefore manifests unfailing intelligence. One who learns this truth in Christian Science no longer considers it modest to acknowledge stupidity but begins at once to renounce and denounce the false sense of mind—what St. Paul calls the "carnal mind." In the degree that he claims infinite, measureless Mind as his consciousness, the only consciousness there is, he becomes aware of divine direction in all his affairs. Moreover, he is influenced by this Mind only, and not by erring mortal minds.

INFINITE TRUTH

More than ever men are asking Pilate's question, "What is truth?" The answer of Christian Science is that Truth is God. On page 465 of Science and Health is this unparalleled definition of God: "God is incorporeal, divine, supreme, infinite Mind, Spirit, Soul, Principle, Life, Truth, Love." Truth, then, is the incorporeal God,—that is, without flesh or any thought of flesh. The Truth which is God is mental, spiritual; is divine consciousness. Truth is the I AM, and because I AM is, we are.

This Truth, that God is, can have no limits. It has no beginning, no ending, no birth, no maturity, no decay, no age. It is unlimited, infinite Being. Truth, then, is not a cold abstraction. There is no Truth without Love and no Love without Truth. The Truth which is forever victor is the Love which is the creator and cause of all that is. Truth is intelligent, always knowing enough to be itself and nothing else. Truth is the only source of true law, unchanging, invariable, eternal. Oneness with God is oneness with Truth, with Life, with good.

INDESTRUCTIBLE LIFE

Christian Science shows that there is one, infinite, eternal, omnipresent Life, which is indestructible, self-existent Truth, absolute Principle, immortal Love. This Life is the unending Life of man, which nothing can take away from him.

When we think rightly of God, when we think rightly of Life, then we know God, then we know Life. It is ours by reflection. We possess it because we understand it. Is it of any avail to attempt to sustain this Life by matter? Can matter nourish and sustain spiritual existence? What did Jesus say? "It is written, Man shall not live by bread alone, but by every word that proceedeth out of the mouth of God." We have, then, the authority of Jesus, that to know God is to live. This Mrs. Eddy has made possible to all through her discovery of Christian Science. If we wish to unite inseparably with Life we must begin by understanding what Life is. Now when we awaken to this Truth, this is the quickening—Life's own stirring in us. To reach the clearer perception of the eternal, indestructible nature of Life is to be united inseparably with Life. The activity of Love in consciousness is the very circulation of Life. When the true meaning of Life is understood Life is made manifest as health, peace, joy. We can begin here and now to reflect eternal, indestructible, continuing Life. When we do this harmony begins to be manifest in all our ways and conditions in home, business circumstances, environments, associates. Life is God, and living is reflecting God's qualities in all that one thinks and does and is.

CHRIST JESUS

On page 344 of Mrs. Eddy's book, "The First Church of Christ, Scientist, and Miscellany," is this arresting statement: "If we say that the sun stands for God, then all his rays collectively stand for Christ, and each separate ray for men and women." The whole light, then, is Christ, and the rays are the children of God. Each individual has his exact place in light. The entire reflection, the whole truth about all, is Christ; Christ comes to each man, and each by demonstration takes his exact and perfect place and part in the wholeness of this reflection. Christ comes to the human and saves from incarnate error.

We come to God by the Son, by expressing the divine nature; this is the way by which we can know God. He can be known only through the Son. His expression; Mind can be known through the idea of Mind. When you gain a spiritual idea, that is Christ, Messiah, Son, Saviour, Redeemer. Through it you know the Father. Your thought includes His idea. His character, His nature, through which you understand Him. Christ is the full and perfect expression of God, of infinite Mind, infinite Love, or Principle. To be the perfect expression he must include all true being. Be the expression of Soul and you are in your rightful place.

Christ includes the truth or spiritual reality, not only about Christ Jesus, but about everybody and everything. The spiritual reality about you and about me and about all things is included in Christ. This spiritual reality is the true reflection or creation.

CORRECT VIEW OF MAN

If God is, as of course He must be, absolutely perfect, infinitely perfect, it is contrary to intelligent judgment to believe that anything He does, or creates, is imperfect. If God is perfect in intelligence, power, wisdom, faculty, action, love, it is not possible that there should be a flaw in the universe, including man. Any contrary supposition would be manifestly absurd. Man is the perfect activity, the perfect product, perfect expression of the Principle of existence. A mortal body is the expression of a mortal, carnal state of consciousness. The real man is the representation of God, divine Mind, the real consciousness. Man is the image of God's being—the full representation of everything that God is. Man has everything that God has, being His reflection. God is Spirit and man is spiritual. God is Truth, and man is truthful. God is Love and man is loving.

My, your, real identity (so falsified and misrepresented in mortal body) is our spiritual consciousness, spiritual substance and structure, of which we are becoming measurably aware. Mortal man's private, personal, so-called matter body consists of the general, untrue concepts of mortals. Our real being—divine Being reflected—consists of true ideas. Putting off the old man means changing our thoughts, our consciousness, our mentality.

:-: A LECTURE ON CHRISTIAN SCIENCE :-:

(Continued from opposite page)

Man is the idea of God. That idea has nothing to do with mortal forms. In our real identity we are each an idea of God, divine, not human, not animal. Let us claim our identity, our sonship, and sing our song of oneness with the divine Mind. When the true concept of man dawns in consciousness, this is the idea of God appearing. Jesus said, "He that believeth on me, believeth not on me, but on him that sent me." Man is, therefore, the eternal, universal, spiritually embodied ideal of all that is good, true, real, enduring, beautiful—and is the entirely spiritual, reflected consciousness of divine Mind; the imperishable, immortal ideal of Soul. This spiritually embodied ideal of Love never was matter, never had matter body, tissues, or organs, couldn't experience sickness, sin, death, decay, degeneration.

What is the kingdom within? It is spiritual awareness of present man, the real man. The selfhood of the human concept is denial of spiritual sonship or oneness with Spirit, God. Its mortal sense of existence is too finite for "anchorage in infinite good" (Unity of Good, p. 43).

Of this unreal dream of a false belief about existence even Shakespeare wrote:

"The cloud-capped towers, the gorgeous palaces,
The solemn temples, the great globe itself,
Yea, all which it inherit, shall dissolve,
And, like this insubstantial pageant faded,
Leave not a rack behind. We are such stuff
As dreams are made on; and our little life
Is rounded with a sleep."

The teachings of Christian Science show that mortals, not immortals, are "such stuff as dreams are made on"—in other words, unreal—and that it is our mortal, false sense of existence that is "rounded with a sleep."

But, in clearer visioned strain writes the poet, Thomas Moore, as quoted by our Leader, in "Miscellaneous Writings" (p. 51):

"When from the lips of Truth one mighty breath
Shall, like a whirlwind, scatter in its breeze
The whole dark pile of human mockeries;
Then shall the reign of Mind commence on earth,
And starting fresh, as from a second birth,
Man in the sunshine of the world's new spring,
Shall walk transparent like some holy thing."

The whole sense of a false mind will disappear in the tides and currents of real Mind, real consciousness, Soul-sense, including none of the mental processes of the human concept of mind. "Unity of Good" (p. 46) says, "The scientific man and his Maker are here; and you would be none other than this man, if you would subordinate the fleshly perceptions to the spiritual sense and source of being." True thoughts constitute the true individuality of man. Man, then, is divine, not human. "Man is a celestial" (No and Yes, p. 26). Then let us pray that divine intelligence transplant our concept of man from human or mortal to infinite being.

EFFECTUAL PRAYER

The teaching of Christian Science on the subject of prayer is in harmony with the Scriptures and is in full accord with the scientific practice of Christ Jesus. "The prayer of faith," said James, the brother of Jesus, "shall save the sick, and the Lord shall raise him up." Christian Science shows by reason and proof that the prayer of faith, that is, of spiritual understanding, does save the sick, and the Lord, God, who is infinite Love, does raise him up.

Many forms of prayer are for the most part petitions to our heavenly Father, beseeching Him to do a favor, or to grant the petitioner's request. What needs changing is not the disposition nor the intention of the Heavenly Father. "God is Love," and He ever waits to bestow all good upon His child. It is the debased will of wayward mortals that stands in need of change. Prayer, then, should not be an effort to alter the unchanging God, "with whom is no variableness, neither shadow of turning," but prayer should be such as will displace wrong thinking by right thinking, and make the one who prays fitted to receive the blessings that await him.

The following case of healing illustrates the marvelous transforming power of Christian Science prayer. Certain members of a large family had become interested in Christian Science through its healing works, but one member was much opposed to Christian Science. To this woman was born a son who was a helpless cripple. His head rested in the hollow of his shoulder, and the only movement he could make was to roll his eyes. The mother had taken him to many physicians, and the final verdict was that there was no help for the child; that if he lived he would be a helpless invalid and probably an imbecile. The mother's family expressed much loving interest, and when she visited them they urged her to turn to Christian Science for the healing of her child. Finally the mother said to a sister, "Well, if you want to, go ahead and treat the child." The sister replied that she would gladly do so, if the mother would do her part and study earnestly the Bible and the Christian Science textbook, Science and Health. This the mother indignantly refused to do and returned home with her child in the same helpless condition as before.

She began to do some earnest thinking. She recalled the many healings that her family had experienced in Christian Science. One day she wrote to her sister that she had begun to read the Bible and Science and Health, and she asked her sister to treat the child. What a transformation took place in the mother's thought! Her mental condition of helplessness gave way to confidence and the expectation of good. Resentment vanished, and love filled her heart. In place of the feeling of separation from her family there came the sense of unity with them. She ceased to look upon deformity as God-ordained, hence as real, and began to see perfection as genuine.

This altered thinking on the part of the mother made her receptive to the truth which the sister-practitioner was realizing for the patient. She knew that the corporeal senses could give no true report concerning God's creation. She saw only God's man, perfect, whole, upright, free. She knew that only false, man-made laws were holding mother and child in bondage; she realized that God's law is the only statute governing man. In opposition to the testimony of the senses and in accordance with the teaching of the Scriptures, she held to the fact that infinite good is the only power, that eternal Mind is all that knows, and that He knows only perfection; that the Truth which is God is the only action and that man, God's idea, is the perpetual manifestation of His continuous activity, and she knew this truth about man was the truth about her patient.

From the moment the child was placed under treatment he began to improve. Little by little he was able to move his arms and legs; finally he could lift his head from the pocket where it had rested, and in time he was fully healed. When he began to go to school he evinced outstanding intelligence and was soon recognized as a leader in his classes. He continued to be the foremost student of the school and at graduation received the highest honors.

What is equally interesting is the fact that he excelled in athletics; he was the fastest runner among boys of his age, and was an outstanding tennis player.

This is one of the many cases which prove that the omnipotence of God is as available today to heal congenital diseases as it was in the day when Jesus healed the man born blind. And then, my friends, there is another important point which this case of healing strikingly illustrates. It shows the powerful influence that mental environment exercises upon the health and intelligence of children. It illustrates what a close connection the thought of parents bears to the well-being of their children, what blessings they can bring to them.

FALLACIES EXPOSED

Truth does not include the occult. The false sense of Mind uses a suppositious method of thought transference. Only the unenlightened have confidence in this. Sometimes we—any of us or all of us—find ourselves where Paul was: we yearn to abide by our standards but go straightway and do the opposite thing: "For the good that I would I do not: but the evil which I would not, that I do." Just at this point we put our finger on animal magnetism. How so? Mortal mind has a modus called suggestion, hypnotism, or thought transference. Because mortal mind is a finity it has limits. The only way to get its thoughts out is to project them into another brain, or false belief of mind. That is its only way of transmitting itself. This method would be impossible to omnipresent divine Mind. Its activities proceed by Principle, divine law, not by human will. It is already omnipresent, because it is infinite. Then it has no need to project, suggest, or transfer. Because all intelligence is already everywhere there is no occasion for suggestion.

All occult systems, processes of the carnal mind, come from a nonsensical fallacy about infinitude; a belief that there is an infinite Mind and then other minds are added. This false belief may declare that God is All, but there is something more; God has all power, but there is a different power, animal magnetism or hypnotism. People in ignorance of the one Mind, which is the originating Principle of thought, may be tripped up by occult fallacies, just as ignorance in any direction will trip a man up. Take an example of electric lights: if we know nothing about electricity, we cannot utilize it; if we step on a live wire, it will destroy us. But if we put in a connecting switch, it will serve us, provide us light, heat, transportation. You have to be familiar with the wiring. If you don't get your transmission wire in you get none of the power, no light, no heat, and your car doesn't move. How do we get connection with Principle? By fulfilling its laws; by thinking as God would have us think.

Every right idea, every right word, every right act, every expression of love, every beautiful experience of humility, charity, gentleness, purity, peace; every obedient act to the Golden Rule, to the Sermon on the Mount, to the Ten Commandments, unites our thought with divine Principle, God. Why? Because these ideas all reflect, express, divine law. The scientific source from which we receive true thoughts, the only origin of our thinking, of our ideas, is Principle, whereas mortal mind has in belief a method by which it projects or transfers its suppositions or fallacies to another. The divine Mind, the only Mind, puts forth ideas in obedience to law and order. The activity of ideas is God's functioning, for true ideas are the expression of divine Mind; they reflect Him by scientific process and law in the divine order of unfoldment. For example, by poor comparison, figs come from the fig tree by the law of its own nature; as a fig tree could not transfer its figs to an olive tree, no more can thoughts be transferred. There is only one Mind to put forth all ideas. This one Mind is everywhere, and there is no other mind to which or from which to transfer thoughts. The Christian Scientist knows that good is the only power, and that the truth he declares cannot be reversed.

DISCOVERER AND FOUNDER

Mrs. Eddy exemplified the healing truth which she taught. It is a joy to testify to this fact from many years of intimate acquaintance with her. My first meeting with Mrs. Eddy occurred the day after I had become a member of The Mother Church. It was on the Fourth of July, 1897, when members of the church who had just attended the Annual Meeting in Boston were guests at her home, Pleasant View, in Concord, New Hampshire. The mayor of Concord, who was present with other distinguished citizens, welcomed the visitors. Among all the concourse, the one unmoved by the applause, by all the stirring events, was Mrs. Eddy herself. There was no sign of exaltation, but rather of selfless joy. She listened attentively to each one of the many speakers, and not infrequently, when words of sincerity and gratitude were voiced, tears glistened in her eyes. Mrs. Eddy spoke in a voice so clear and strong that all in the vast assembly could hear her distinctly. (The memorable address which she gave on this occasion is recorded in her book, "Miscellaneous Writings," pp. 251-253.) I knew then that Mrs. Eddy is God's messenger to this age.

During the twelve years that followed, it was my privilege to see Mrs. Eddy almost daily; for nine years I lived in her home city and served her in various ways, part of the time, as secretary, and during the last three years that she was with us I was a member of her household at Chestnut Hill, Massachusetts.

Mrs. Eddy was tireless in her industry; her capacity for work was prodigious. For example, at the time Mrs. Eddy was living at the college on Columbus Avenue, Boston, and engaged in all the labored details of purchasing and equipping her home on Commonwealth Avenue, she was founding The Christian Science Journal, changing editors frequently, and teaching crowded classes. Yet, with all these labors, she was able, in the mornings before teaching her class, to dictate that marvelous work, "Unity of Good."

When she was in her eighty-seventh year she established an international daily newspaper, The Christian Science Monitor, which is now recognized as one of the leading dailies of the world, and every day she read it thoroughly. Up to the time of her passing she had oversight of all the affairs of her vast movement. Every important step awaited her decision.

She was interested in all that concerned the public welfare. Her generous gifts for modern highway improvements inaugurated the good roads movement in New Hampshire. She was keenly interested in exploration and invention—in everything that meant victory over limitation. But in all these matters everything was secondary to the spiritual.

She radiated light and joy upon all about her. Grace and love and unfailing tenderness distinguished her no less than intelligence, strength and profound penetration into the hidden causes that lie back of all outward manifestations. Always she was the fearless Leader, obedient to the revelation that God had given her.

PEACE ON EARTH

In no one thing was Mrs. Eddy more remarkable than in her ability to rise above trials. An instance is her poem, "Signs of the Heart." It was written at Pleasant View, Concord, New Hampshire, in 1899, when persecutions were cruelly heavy. Injustice, malice, hatred, seemed in control. A lawsuit outrageously unjust was brought against her by an unscrupulous student who had been richly benefited by Mrs. Eddy's kindness. She describes her experience in her book, "The First Church of Christ, Scientist, and Miscellany" (p. 131): "The signet of the great heart, given to me in a little symbol, seals the covenant of everlasting love." The symbol referred to was a simple rubber band falling from her packet of mail in the form of a heart. She turned her thought from this symbol to the great heart of divine Love, and the poem, "Signs of the Heart," was born. Listen to just one characteristic stanza (Poems, p. 24):

"Come to me, peace on earth!
From out life's billowy sea,—
A wave of welcome birth,—
The Life that lives in Thee!
O Love divine,
This heart of Thine
Is all I need to comfort mine."

During Mrs. Eddy's long residence in Concord many of her fellow citizens were healed and transformed through their contacts with her. The following is one of many cases that came under my close observation. A citizen of Concord, who was not interested in Christian Science, was suffering from what materia medica diagnosed as the last stages of pulmonary consumption. Her neighbors were expecting her decease and were looking each morning to see crepe on the door. Propped up in an invalid chair, she observed from her window a carriage in which was a beautiful woman, whose face made a profound impression on her. She learned from her neighbors that the woman was Mrs. Eddy. A few days later, while she was watching at the window, the carriage passed again. Mrs. Eddy saw the invalid and greeted her with a smile. From that moment a new day dawned for her. She was so uplifted that she dressed herself and paid a visit to the Christian Science Reading Room. There she learned something of Mrs. Eddy's teachings. She saw that sickness is not a curse sent by God, but a false belief, which Christ, Truth, destroys. In the evening, when her husband came home, he was surprised to find her preparing a substantial meal for him. She began to study faithfully the Bible and Science and Health, and to attend the church services. She continued to gain and was soon in good health. Always she gave full credit to Mrs. Eddy for her recovery, and joyfully expressed her gratitude on every fitting occasion.

CONCLUSION

I leave with you a message which Mrs. Eddy once wrote to her followers, and which you will find on page 14 of "The People's Idea of God": "O Christian Scientists, thou of the church of the new-born; awake to a higher and holier love for God and man; put on the whole armor of Truth; rejoice in hope; be patient in tribulation,—that ye may go to the bed of anguish, and look upon this dream of life in matter, girt with a higher sense of omnipotence; and behold once again the power of divine Life and Love to heal and reinstate man in God's own image and likeness, having 'one Lord, one faith, one baptism.'"

EDITORIAL COMMENT

The sad sight of mountain-sides laid bare by fire in Southern California, is deploring as one motors over the atlitude country; but there is an effort being made to take advantage of the rainy season through a seed-sowing campaign. Twenty-four tons of mustard seed, strewn by hand and from airplanes are being planted on the fire-scarred mountain slopes back of Los Angeles and Santa Barbara. The tiny mustard seed, the proclivities of which for more permanent vegetation. By sending their roots into the denuded topsoil, the mustard plants tend to check the flow of water down precipitous slopes, and thus retain a large amount of silt and gravel which might otherwise be washed down into the populated valleys.

* * *

Bounteous rains, that crowning wealth in life-giving moisture which is the most valuable asset to all the Southland and Nature's life-blood given freely to the entire vegetable family has registered a rain record which is evident assurance that the conservation of moisture is adequate to supply with such an abundance it remains for the most pessimistic to rejoice. Not in twenty years has there been such a record rainfall. Last winter we had an extraordinary amount but this year tops that record by about five inches. As a result the Southland is already blossoming like the rose. The benefits of the best range and pasture feed conditions this winter are being enjoyed and many of the old settlers claim it is the finest in 40 years. Rains have appeared at an opportune time since early in the fall, with the result that pastures have been green since November, last year.

* * *

California's last major event of international fame was the July 30-August 14 tenth Olympic Games in 1932, with its 2,000 trained athletes. The next international event for California will be this summer, when it holds its California-Pacific Exposition at San Diego, opening on May 29th. Therefore Pacific Coast people who did not get to the Century of Progress in Chicago may rest easy in their minds. World's Fairs are now proposed besides San Diego, at Portland, San Francisco and Los Angeles—all to come before 1940. San Diego is already putting on the big finish for the first of the list. It is no wild guess to say that the western coast cities will have to do things, if they outdo San Diego. She has the setting, the historical romance and the climatic conditions. This year will mean great things for Southern California and the West because of the great San Diego demonstration.

* * *

With the Nation's biggest legislation program now going strong, Congress presents an amazing paradox of questions of stirring interest to the American multitudes. There is no time for passion, hatred or shallow criticism. Things in Washington are grave enough to demand economy of time and expense to the "breaking point." We need peace on the floor; more of the friendly spirit among representatives and less of the spirit of spite that weakens stalwart hearts, moving men to strange vituperations and deeds unbecoming to a congressman. Never a time when there was so much to think about—serious thinking. Hunger and comforts of life are a clarion call from the destitute and distressed. Old age and moneyless circumstances have pauperized thousands, while millions in the flower of manhood are made idle. If Congress can't help America now, God have mercy on the future generation. Only calmness, patience and wise statecraft can ever hope to discover and pursue the way to a satisfactory goal.

* * *

The demands for relief today are at the greatest in all modern history.

The Federal checkup is way out of proportion to the amount of production at hand. The one and great need is an equitable distribution and this covers financial aid as well. The country seems to be doing the best it can under present circumstances.

It is easy to formulate opinion against person or nation, especially if intended to make some malicious or otherwise deviating charge. "Uncle Sam" has taken a lot of slanderous criticism from abroad and at home; the goods when a plea for relief is made. During these days of depression, tons of food, grain, clothing, vegetables, fruits and bundles of generous sympathy have gone into channels of relief for the sick, hungry and naked.

One lesson this depression has taught the nation, is, that we are going to be more careful how we get into another war. The scar and horror of the last war is upon the mind of the people to our great sorrow; and we shall see still more misery from its effect for years to come. This is something to think over.

Our national debt is increasing at such an alarming rate that we are now in the 30 billions and if not stopped soon will lead to complete debt repudiation. Twenty per cent of the people pay 80 per cent of the taxes while ten per cent of the people control 90 per cent of the wealth. The majority of the 20 per cent who pay the taxes belong to the group who only control 10 per cent of the wealth. How can this staggering debt be paid with our present tax system? This is the question for political United States to solve.

OUR ELDER BROTHERS

On Thursday, March 28th at 7:30 p. m. in the clubrooms at 1940 Abbott street Mrs. Frances M. Dadd of the Point Loma Headquarters will speak on "Our Elder Brothers" at the special meeting of the Ocean Beach Theosophical club.

The public is most cordially invited

C. LEON DE ARYAN STATES POLICY IF ELECTED MAYOR

(Political Announcement)

In announcing his candidacy for mayor of San Diego, C. Leon de Aryan, editor of "The Broom," offers the following platform:

"I cannot see how prosperity can return as long as the people who work are not being paid good wages so that they may buy the products of the factories which in turn gives employment to the producers. How can the farmers sell their products unless the wage earners are able to buy them? For this reason I stand for the five dollars minimum wage at the city hall as a beginning of better wages all around.

"I shall improve conditions in the health department just as County Supervisor Harvey Hicks is taking the right steps to improve conditions at the County hospital. San Diego must appoint a clean health officer!

"I shall not compromise with the underworld or tolerate the insufferable conditions resultant from an abuse of the liquor traffic and the honky-tonk saloons and dance halls. I shall treat them all alike whether they operate a hole in the wall, dispensing liquors, or run a hundred thousand dollar drink and dance emporium. The safety of our people comes first, and not the profits of the liquor trade.

"I shall not take dictation from the San Diego Sun or any group of organized minorities who are out to exploit the people at large. I'll be the mayor and everybody will know it!

"I shall keep my oath of office and not side-step the provisions of the city charter and of the constitution of the United States.

"I place my faith in God and not in demagogues or the malefactors of great wealth.

"Your vote for me for mayor means the beginning of real government for San Diego."

POINT LOMA HIGH RUMMAGE SALE

Members and friends of Point Loma Parent-Teacher association are asked to send or bring all contributions as soon as possible to 3244 Dumas street, or to telephone B-0843--W or B-0554-J, for aid in collection. Please bear in mind that no offer is too small or too unworthy of consideration. The PTA is in need of articles to sell. Your support is earnestly sought.

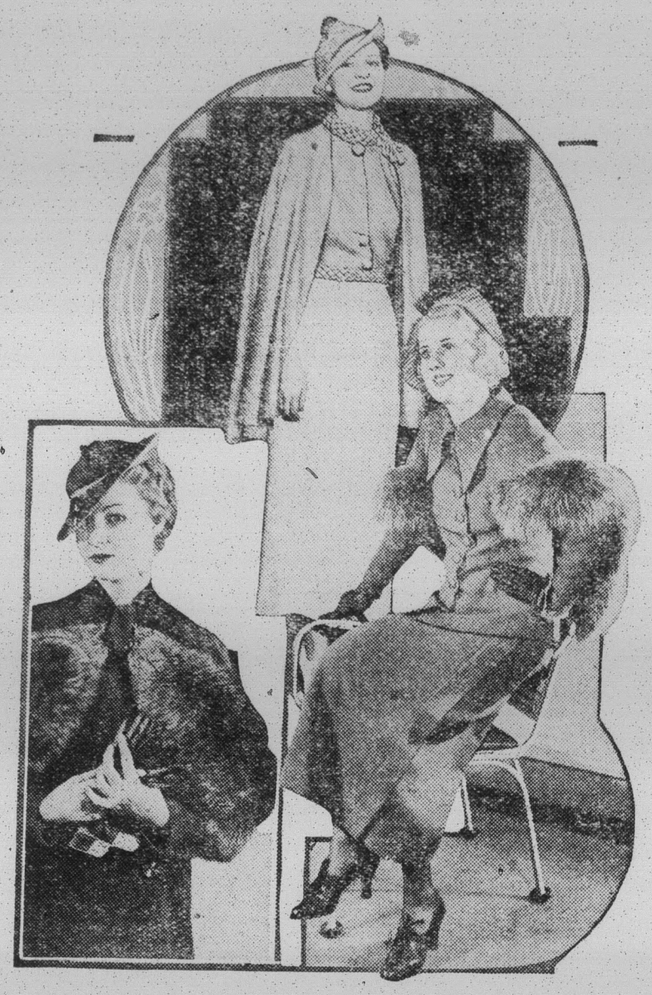
Many Cape-Suits, Many Cape-Coats

By CHERIE NICHOLAS



PREFIX the word cape to suit, coat or ensemble and you will be speaking in terms of smartest fashion. A tremendous vogue is predicted for the perfectly stunning cape-suits, cape-coats and cape-ensembles which are so dramatically lending their fashionable presence to the spring style panorama.

The three models pictured were shown at the fashion revue recently presented by the Chicago wholesale market council. Seeing that they speak louder than words as to the new spring fashion trends, we are passing them on to you via illustration.

This trio of smart modes is style-revealing from any number of viewpoints. Firstly the group bespeaks the versatility of the new caped costumes—a coat to the left, one of the very new waistcoat effects in the center, a simple, youthful two-piece suit to the right, each of which is styled with a cape.

A most interesting feature in regard to the tailored suit on the figure seated is the narrow skirt which exploits a slit hemline, a detail which is considered tres chic for street wear. But wait until we tell you of the breath-taking color scheme of this charming tailleur! The cloth of which it is made is in the new blue called "delphinia," handsomely trimmed with a wide bordering of choice fox fur, and here is the big part of the story, it is dyed in a harmonizing darker blue "tropez"—a perfect symphony in blue even to the girlish off-the-face hat, the brim of which is smartly fluted at the edge. Fur dyed in exotic colors to match the materials it trims is one of the thrilling adventures which fashion is making this season.

Of more than passing interest, too, is the pointed turnover collar on the jacket which gives a decidedly youthful aspect to the neckline. The graceful fur-bordered cape has likewise gone pointed at the back to below the waistline in compliment to the collar.

In regard to the model centered in the group, the handsome moire brocade which fashions it is one of the interesting novelty weaves which emphasizes the fact that fabrics were never more varied and fascinating than they are for the new season. It is also said that we are entering into an era of color the likes of which we have not known for years and the green-gold tone of the moire brocade for the caped waistcoat together with the beige of the skirt goes a far way to verify the statement. This compose of two striking colors also confirms reports that daring combinations distinguish the majority of costumes this season. Note the rope braidings of self-fabric which collar the throat and girdle the waist, which is a trend in current fashion that is chic to the 'nth degree.

Contrasting the color-glory of the cape-suits shown, enter the handsome topcoat of black cloth to the left in the illustration. It is an aristocrat among spring coats, the sort in which best dressed women find appeal. The wide banding of superb silver fox adds greatly to its distinction. The cape fits snugly which is a noteworthy detail to keep in mind, as it is in keeping with the prevailing idea. It is also well to remember when selecting your new spring coat that silver fox is one of the very smart first-choice furs this season.

DARK ACCENTS

By CHERIE NICHOLAS

With the pastel costume, dark accessories are considered good style. The outfit pictured shows what can be done with this theme. A cloth frock in a subtle soft pastel green is artfully contrasted with a scarf of plaided taffeta in rich deep green and golden yellow. Note the modish calf bag which perfects the color scheme in that its dark green calfskin is enhanced with a diamond cut-out bar of gold finished metal. Or if you prefer to think of this costume in tones of blue the gown of pale blue would call for the scarf in navy and a lighter blue taffeta with thin white lines in its plaided design. The calf bag of course would be in navy. Which reminds us that the widespread flair for navy extends to footwear and that all the leading booteries are making a big display of navy blue shoes.

SPRING FASHIONS ARE INTERESTING

Rare color combinations, unique types and arrangements of trimmings, and tricky fabrics are doing their best to attract women's attention to the new spring fashions. The alliance of tomato red and chartreuse is one of the most arresting of the colors that you'll see but no more impressive than the use of red and yellow. A woolen jacket costume of a porous, honeycomb, woolen appears in the chartreuse shade but adds a stomacher of the tomato colored crepe.

One evidence of the discard of the red and yellow rule is a yellow knitted frock trimmed with bright red buttons. These buttons fasten the shirtwaist front, the composition of which they are made being duplicated on the red leather belt. A silk scarf that is striped with alternating bands of the two colors is tied carelessly around the neck.

Brown Woolly Tweed Now Combined With Taffeta

Tweed and taffeta meet today on a common footing. Marcelle Dormoy combines them in a coat adequately named "Riviera" in a brown woolly tweed with a scarf collar-tie in solid brown taffeta.

The coat is three-quarters, flaps open in front from where the taffeta makes a crisp bow near the throat. It has that wide back flare that is so good now, and the sleeves are rather baggy but close in around the wrists.

Jenny contributes a smart redingote in black faille worn over a dress in white silk pique.

Chamois Colored Shoes

Smartest among the new sports shoes now being shown for resort wear are chamois color, trimmed with brown, with black or white. They can be worn with all light clothes.

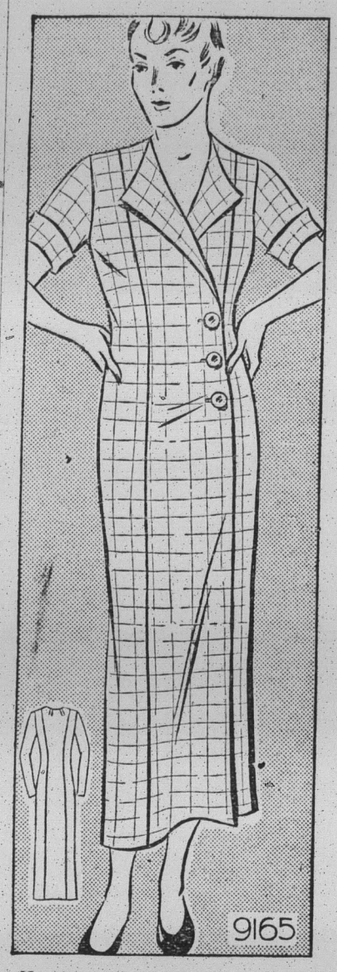
House Frock on Coat-Like Lines

PATTERN 9165



Here's a house frock that's not only slenderizing and trim because of its coat-like lines—but essentially practical at the same time. For it's the sort of smart affair that you can slip into quickly—just three buttons to fasten—and be sure of looking your housewifely best! As every figure-conscious woman knows, long panels sweeping from hem to shoulder, back and front, create an illusion of slenderness—and those pert revers add a nice clean-cut look to the whole frock. Of course, one of the best points about this model is that it may be spread out and ironed flat. Choose printed percale, broadcloth or gingham for it!

Pattern 9165 may be ordered only in sizes 34, 36, 38, 40, 42, 44 and 46. Size 36 requires 4⅞ yards 36 inch fabric.

Send FIFTEEN CENTS in coins or stamps (coins preferred) for EACH pattern. Be sure to write plainly your NAME, ADDRESS, the STYLE NUMBER and SIZE of each pattern.

Complete, diagrammed sew chart included.

Send your order to Sewing Circle Pattern Department, 232 West Eighteenth street, New York.

Smiles

AFFABLE BROKER

"What kind of money do you prefer?"

"I'm not fastidious," answered Mr. Dustin Stax. "What kind have you?"

Fallacies

"They are getting fallacies even into nursery rhymes," said Farmer Corntossel.

"It's as serious as that?"

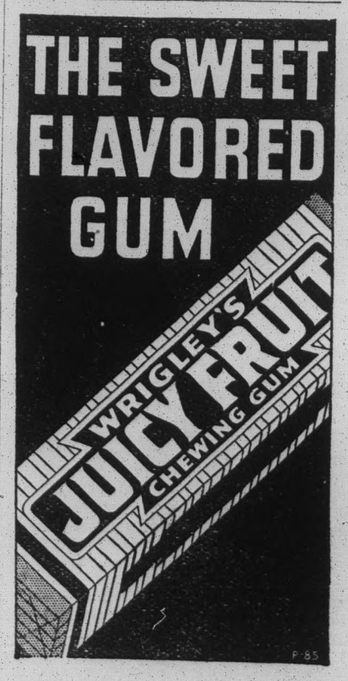
"Yes, sir. When you're ordered to kill off porkers, what excuse is there for saying, 'This little pig went to market'?"

Natural Effect

The accused had just been convicted of bigamy, and the judge asked, "Have you anything to say?"

"No, not a word," was the sullen reply.

"It's hardly likely," mused the judge. "A man with two wives would never get a chance."—Stray Stories.



YOU KNOW IT

Try Faster Way to Relieve Your Colds

Medical Discovery Bringing Almost Instant Relief to Millions

1. Take 2 BAYER Aspirin Tablets. Make sure you get the BAYER Tablets you ask for.

2. Drink a full glass of water. Repeat treatment in 2 hours.

3. If throat is sore, crush and stir 3 BAYER Aspirin Tablets in a third of a glass of water. Gargle twice. This eases throat soreness almost instantly.

REMEMBER DIRECTIONS

The simple method pictured here is the way many doctors now treat colds and the aches and pains colds bring with them!

It is recognized as a safe, sure, QUICK way. For it will relieve an ordinary cold almost as fast as you caught it.

Ask your doctor about this. And when you buy, be sure that you get the real BAYER Aspirin Tablets. They dissolve (disintegrate) almost instantly. And thus work almost instantly when you take them. And for a gargle, Genuine Bayer Aspirin Tablets disintegrate with speed and completeness, leaving no irritating particles or grittiness.

BAYER Aspirin prices have been decisively reduced on all sizes, so there's no point now in accepting other than the real Bayer article you want.

NOW 15¢

PRICES on Genuine Bayer Aspirin Radically Reduced on All Sizes

Darwin's Theory Given Rap by English Author

Probably no biologist doubts the validity of evolution. On the other hand, natural selection and the survival of the fittest, the very core of Darwin's theory, are no longer accepted as the sole agencies at work in the creation of new species and varieties. Since the days of Mendel it has become apparent that the mechanism of heredity is both delicate and complex. Moreover, there are the endocrine glands, with their tremendous potentialities for modifying the organism. Lastly, the relation of that organism to its environment is not nearly so direct and simple as Darwin assumed. How the more imaginative biologists think about evolution and especially the problem of man's descent is well exemplified by "The Coming of Man," a recently published book in which Dr. R. Broom, an English authority on amphibians, sets forth his own hypothesis.

It is generally agreed that life first developed in the sea. How, then, did the first amphibian evolve? What was the bold animal that first ventured on land and adapted itself wholly or partially to life under entirely new circumstances? When we ask such questions it is apparent that natural selection and the survival of the fittest do not meet the case.

Doctor Brown holds that physical structure, courage, pugnacity, efficiency were not solely responsible for the transition. There was something unstable about the first adventurer that came out of the sea. He was like an unstable chemical compound that changes into something else—something out of which a reptile could evolve, something that was the result of a crisis.

Examine all the other animals, and the transition from an old to a newer form seems always to be the result of critical instability. Despite the convincing array of fossils that shows plainly enough how the one-toed horse of today evolved from an ancient, five-toed equine animal not much bigger than a St. Bernard dog, the jumps are marked. Between five toes and four toes there is no gradual transition, nothing like a digital diminuendo.

Crisis, everywhere crisis, whether it be fish or amphibian, reptile or mammal. With man it is the same—one of the most unstable creatures ever evolved. In a state of something like fermentation, he has always been in a critical turmoil. Unlike the ant or the bee, he is not highly specialized. If he ever does settle down, his history will be like that of most social creatures—a repetition over hundreds of millions of years of the same biological events and facts. He will cease to evolve. —New York Times.

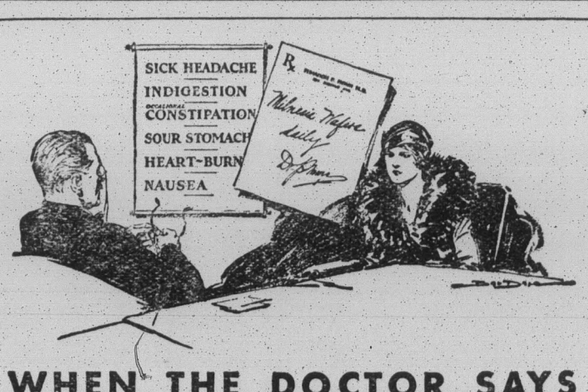
"SIMONIZ Made the Finish Last Longer!"

Simoniz your car. Then notice how much longer the finish lasts. Fifty or even a hundred thousand miles are nothing to a Simonized car. Simoniz protects the finish in all weather and makes it stay beautiful. So, always insist on Simoniz and Simoniz Kleener for your car.

MOTORISTS WISE
SIMONIZ

The new improved Simoniz Kleener quickly restores the lustre to dull cars. Simoniz, too, is easy to apply and it keeps the finish beautiful for years.



WHEN THE DOCTOR SAYS YOU HAVE "TOO MUCH ACID"

Health, your doctor will tell you, is based on a delicate balance in the system between *alkalinity* and *acidity*. Modern day habits, especially the foods we eat, destroy this balance by creating *excess acids*. Watch for acid danger signals!

Guilty of these Every Day Habits?
Eat Too Much
Smoke Too Much
No Exercise
Late Hours

In the mouth acids attack enamel, bring tooth decay and bad breath. In the stomach they attack delicate linings and bring sick headaches, indigestion, gas and constipation, and often chronic disorders.

Neutralize excess acids at once with Milnesia Wafers—original Milk of Magnesia in tasty tablet form. One Wafer before bedtime, and the whole digestive system, from mouth and gums to intestines, is kept sweet and clean and clear of these harmful acids. Thousands of physicians now recommend Milnesia instead of old fashioned *liquid* Milk of Magnesia.

Economical, too!
Each Milnesia package contains more Magnesium Hydroxide than all other liquid forms.

MILNESIA
Corrects Acids—Keeps You Fit!

MAKE HOBBY OF WEATHER LORE, BUREAU URGES

Meteorology as a hobby for the people of the United States is in high favor with the weather bureau. Simple weather observations by 4,500 co-operators, who receive no pay but use government-owned instruments, have long added materially to the great mass of meteorolgical data on file in Washington. Additional records from dependable sources would be most useful in drawing a true picture of the climate of this continent.

Meteorology is a common hobby among private citizens abroad, weather bureau officials say. At one time it was a common hobby among American citizens also, but with the establishment of a professional forecasting service in 1870 interest in it waned, not to be revived until the last few years. The weather bureau ascribes this reawakened interest, in part at least, to the unusual weather features of recent times—the Mississippi flood of 1927, the abnormally mild winter over most of the country of 1933-34, and the drouth of 1934; to advances in aviation, calling for more weatherwise pilots; and to the newly recognized relation between weather and forest fires, which has converted many foresters and lumbermen into lay students of meteorology.

In meteorology, weather bureau officials hold, people of many temperaments and different callings can find a satisfactory hobby. Merely keeping a diary of the weather will interest many, and such records have provided supplementary information of great value to official climatologists. Setting up meteorological instruments—simple sets as well as elaborate ones—and recording the readings will satisfy hobby seekers of a more scientific turn of mind.

An intensive study of the clouds, accompanied by picture-taking, both still and moving, is suggested for others. Such photographs, the weather men say, may supply an important link in solving some weather mystery. Both statisticians and people concerned with human activities can take meteorology as a hobby, each group using a different angle of approach. Meteorological physics, air-mass analysis, and forecasting are among the many phases of meteorology that make worth-while hobbies, in the opinion of weather bureau officials.

Along came Ruth

DICK, I HATE TO DROP YOU FROM THE TEAM—BUT YOU'LL NEVER MAKE AN ATHLETE UNTIL YOU GET RID OF THAT BAD TEMPER!
SAY—WHAT IS THIS, ANYHOW—A BASEBALL TEAM OR A COURSE IN SOCIAL GRACES?
MR. COFFEE NERVES
RUTH, IF YOU'D MARRY ME I'D QUIT COLLEGE TOMORROW AND GO TO WORK!
WHO IS SHE TO BE PARTICULAR? WHEN SHE REFUSES TO MARRY YOU THE LUCK IS ALL ON YOUR SIDE!
I'D MARRY YOU IN A MINUTE, DICK, IF YOU WEREN'T SUCH A GROUCH. BUT I REMEMBER WHAT MOTHER WENT THROUGH BECAUSE OF DAD'S BAD DISPOSITION!
MR. COFFEE NERVES
OF COURSE THERE WAS SOME EXCUSE FOR FATHER. HE HAD HEADACHES AND INDIGESTION ... AND DIDN'T SLEEP WELL
WHAT A WOMAN! WHEN HER FATHER HAD 'EM SHE WAS SORRY FOR HIM ... WHEN YOU HAVE 'EM SHE'S GLAD OF IT!
GOOD GRIEF, RUTH... DON'T YOU REALIZE I HAVE 'EM, TOO?
COFFEE NERVES
YOU PROBABLY HAVE COFFEE-NERVES! WHY DON'T YOU GIVE UP COFFEE, LIKE DAD DID, AND SWITCH TO POSTUM FOR 30 DAYS?
CURSES! I'VE LOST ANOTHER VICTIM! CONFOUND THAT MEDDLING CO-ED!
WELL... IT MUST HAVE HELPED YOUR DAD... HE'S CERTAINLY NOT GROUCHY NOW! I BELIEVE I'LL TRY IT!
LATER
RUTH, LOOK! I'VE BEEN VOTED THE MOST VALUABLE PLAYER ON THE TEAM!
THE COACH TOLD ME, DICK. AND SINCE YOU SWITCHED TO POSTUM I'VE BEEN THINKING YOU'LL MAKE AS GOOD A HUSBAND AS YOU HAVE AN ATHLETE!

"I NEVER dreamed coffee could have such an effect on me . . . although I knew it was bad for children!"

"Oh, coffee disagrees with lots of older people. The caffein in coffee gives 'em indigestion, upsets their nerves and keeps 'em awake nights!"

. . .

If you suspect coffee disagrees with you . . . try Postum for 30 days. Postum contains no caffein. It is simply whole wheat and bran, roasted and slightly sweetened. Easy to make, and costs less than ½ cent a cup. It's a delicious drink, too . . . and may prove of real value in helping your system throw off the ill effects of caffein. A product of General Foods.

Business established in the year 1846

LOCAL AND PERSONAL EVENTS

Frank B. McElwee and son Frank, jr., were business visitors at Glendale Saturday and Sunday.

—‡-‡—

A baby daughter was born March 9th, to Mr. and Mrs. Robert R. Walther of 5035 Brighton avenue.

—‡-‡—

Rev. and Mrs. John H. Engle of Huntington Beach were guests of Rev. and Mrs. Myron Insko Tuesday and Wednesday.

—‡-‡—

Richley Hardware last week added the Universal electric refrigerator to their line and report this to be an household equipment of outstanding value.

—‡-‡—

The old Ambuhl restaurant property at 5046 Newport avenue will be opened within a few days, or by April 1st, by A. J. Kilpatrick as a malted milk and sandwich business.

—‡-‡—

The Strand Radio Co., last week bought a new Chevrolet delivery truck which is a mighty fine representation for their business. They report the sale and also delivery of a half dozen or more Norge electric refrigerators as well.

—‡-‡—

Dr. and Mrs. I. W. Parks were in attendance at divisional meet of Kiwanis held at Yuma Saturday evening. An especially fine dinner was reported served in the Masonic hall at Yuma by O.E.S. women assisted by the Camp Fire girls.

—‡-‡—

Ernest J. Barker, brother of W. K. Barker of Ocean Beach, died at Navy hospital Tuesday, March 19th, age 33 years. Deceased was the son of Rebecca Barker of Cleveland, Tenn. Funeral arrangements are being made by Bonham Bros.

—‡-‡—

Sammy Lipsett stopped into the News office Wednesday to say hello, and while here informed us that he and his mother are moving back to Ocean Beach. Sam has accepted a position with KFSD and glad to be back with us after more than two years absence. Next week Mrs. Lipsett and son expect to move into their home at 4966 Coronado Ave.

—‡-‡—

A St. Ptrick's luncheon was given Friday afternoon of last week by Mrs. U. J. Sollenberger, 5076 Niagara avenue, at which a number of close friends enjoyed the day at bridge. Green and white table decorations were the motif in honor of the occasion. Guests included Mesdames N. F. Dunn, J. G. Gooch, Elma Longfield, A. W. Kempp and Miss Violet Ramirez.

—‡-‡—

Dry kelp and some rubbish was cleaned from our beach last Saturday by a force of half dozen men after many urgent appeals had been made to the city manager's office requesting this much needed cleanup. While it has been difficult to procure this much desired assistance thru the winter the department now promises regular attention to the beaches after April 1st. Let's hope we get it.

—‡-‡—

Miss Marie Moore entertained Lt. (j.g.) Ralph W. Elden, U.S.N. at dinner Thursday night. Lt. Elden has been chosen as best man by Miss Moore and her fiance, Patrick Hannay, for the wedding, April 5. At Saturday noon, Miss Winifred Kenline, who is to be Miss Moore's maid of honor, Miss Moore and Lt. Elder drove to Los Angeles where they joined Mr. Hannay. The bridal party celebrated at the La Golondrina in Little Mexico on Olvera street in Los Angeles. They also visited friends including Lt. and Mrs. Liou Miles of Long Beach.

The SERA dramatic players will give a play at the Point Loma high school March 27. Doors open at 7 p. m. show will start 8 p. m. Free, everyone welcome.

—‡-‡—

The Silver Spray plunge has a new coach and woman instructor since March 1st. Sally Norton is the lady who expects to create a lot of interest in swimming and other events at this fine salt water plunge.

—‡-‡—

Mrs. Louise Peck left Wednesday afternoon for Butte, Montana, to attend business matters in the north. She expects to return to Ocean Beach about June first.

—‡-‡—

The Girl Scouts (Silver Arrow and Iris troops) will have a tea and bazaar on Thursday, April 4, at the Wallace hall from 4 to 6 p. m. The public is invited.

—‡-‡—

Ed Wickern and daughter Shirley motored to Imperial valley Saturday afternoon, Ed continuing on to Yuma to attend a divisional meeting of Kiwanis members Saturday evening. Shirley remained in El Centro with friends where the two visited Sunday looking over the valley.

—‡-‡—

Tony's Cafe since branching out and remodeling, now get out a daily "news" bulletin. Uncle Rastus, author of the news gives current happenings a real kick. You will find a new bulletin in the Tony's window every morning and find Uncle Rastus hits the nail on the head.

—‡-‡—

M. N. Brisbin of St. Anthony, Idaho, and sister, Mrs. Ruth Curry of Long Beach, California, spent Monday in Ocean Beach visiting their cousins, Mrs. Lissie Warren and Miss Lois Brisbin of 5020 Niagara avenue. Mr. Brisbin was also a caller at the Ocean Beach News office talking over past events with Mrs. Hartvigsen, the two having attended and graduated from the same high school in Idaho.

—‡-‡—

Last Friday evening Mrs. Roy Lee and trailer Roy Lee, entertained in their home on Santa Monica avenue, honoring past matrons and past patrons of 1934. It also celebrated the birthday of Minnie Alston past matron of Southern Star and Mary Lee past matron of Point Loma. Bridge was enjoyed and refreshments served. Guests of the evening were: Mr. and Mrs. Ed Hastings, Mr. and Mrs. Harry Clark, Mr. and Mrs. Wm. Harrell, Mr. and Mrs. Frank Fikes and Mr. and Mrs. Walter Alston..

POINT LOMA HIGH SCHOOL TO PRESENT SHUBERT OPERA TO STATE P.-T.A. CONVENTION

The Point Loma High school glee clubs will present Schubert's lovely opera "Rosamunde" in the Russ Auditorium on Tuesday, May 28, for the State convention of California Parents and Teachers. This special performance, following the two regular shows to be given May the 16th and 17th in the Point Loma High school auditorium, will be open only to P. T. A. members.

The Parent Teachers association invited Myron Green, music-department head at Point Loma High, to give the opera as a prelude to the state-wide convention. Under the leadership of Mr. Green, the performance is gradually taking form, with W. Emery Shepherd directing dramatics and stage craft and Mrs. Eleanore Dixon instructing the thirty ballet artists.

The art department has charge of costume designing and posters while the Point Loma PTA, under the direction of Mrs. Frank Levin is executing these costume designs with the assistance of Mrs. Perry of the domestic science department. Each member of the glee clubs is contributing $1.50 toward these costumes which will after the three performances, be presented to the drama department of Point Loma High.

ANNOUNCEMENT!!

CHURCHES OF CHRIST, SCIENTIST
"Matter" is the subject of the Lesson-Sermon on Sunday in all branches of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. The Golden Text is from Habakkuk: "Woe unto him that saith to the wood, Awake; to the dumb stone, Arise, it shall teach! Behold, it is laid over with gold and silver, and there is no breath at all in the midst of it."

One of the Scriptural selections in the Lesson-Sermon includes these verses from Matthew: "And when Jesus was come into Peter's house, he saw his wife's mother laid, and sick of a fever. And he touched her hand, and the fever left her: and she arose, and ministered unto them. When the even was come, they brought unto him many that were possessed with devils: and he cast out the spirits with his word, and healed all that were sick: that it might be fulfilled which was spoken by Esaias the prophet, saying, Himself took our infirmities, and bare our sicknesses."

A correlative passage from "Science and Health with Key to the Scriptures," by Mary Baker Eddy, states, "Our Master's first article of faith propounded to his students was healing, and he proved his faith by his works."

LOTUS CIRCLE FOR CHILDREN

The Ocean Beach Theosophical Lotus Circle for children meets every Sunday morning at 1940 Abbott St.

This Sunday, March 24th, C. J. Ryan, M. A., of the Theosophical University, Point Loma, will conduct the study class. Lesson-subject: "Our Younger Brothers".

SHERIDAN'S "THE RIVALS" TO BE PRESENTED

The dramatic department of Point Loma jr., and sr., high will present "The Rivals," at the school auditorium, April 11-12. Tickets are now on sale by members of Point Loma PTA.

Lutheran Mission

"Who is yet an Enemy of Christ and His Kingdom?" will be the subject to be discussed at the 10:45 o'clock service next Sunday morning.

The Sunday school lesson is "Christ Before the High Priest." A number of interesting thoughts will be brought out in the various departments. Bring the children closer to Jesus their Savior by sending them to Sunday school.

Lenten Service Wednesday 7:30 p. m.

"Christ Under Oath" will be the series, "Striking Passion Scenes", to be considered. During this season of Lent Jesus is passing by. Will you devote at least one hour this week to the message of the Cross that concerns your soul?

We cordially invite you to attend all these services which are held at the Woman's club house. The Word of Jesus will bring comfort a help to you in these perilous times.

THE THEOSOPHICAL SOCIETY: POINT LOMA

At Theosophical headquarters, Point Loma, next Sunday afternoon, March 24, at 3 p. m., the subject of the forum-lecture will be "Crime—Its Cause and Cure," The speaker will be Abbott Clark, of the Theosophical society. Mr. Clark will be assisted in answering questions by Miss Alice Pearce, a teacher in the public schools of Iowa before joining the Theosophical headquarters' staff.

Mr. Clark was one of the pioneer Pacific coast lecturers on Theosophy and also pioneered in Theosophical work among the inmates of the California State's prisons at San Quentin and Folsom. He has spent many years in practical work among prisoners and all classes of down-and-outs. This work in the re-education and reformation of criminals was so successful that the wardens of the prisons paid high tribute to the Theosophists for improving the standard of conduct and ease of discipline of the prisoners.

FOR RENT SIGNS—5c and 10c at The Ocean Beach News.

FRANK JENNINGS. EX-SHERIFF. DIES AT POINT LOMA HOME

Frank Sherman Jennings. 83, father of Paul R. Jennings, vice president of the San Diego branch of the Bank of America, died Tuesday night at his residence, 1036 Bayfront st., Point Loma.

Mr. Jennings was a native of Ohio and was graduated from Ann Arbor Law school After graduation he moved to Winfield, Kan, where he practiced law. He served as district attorney and was elected to the Kansas senate for one term.

About 47 years ago he came to San Diego, where he again took up the legal profession. He was sheriff of San Diego county from 1894 to 1902. He represented the San Diego Land and Town Co. in its legal affairs and owned considerable property on Point Loma. He had been retired for the last 10 years.

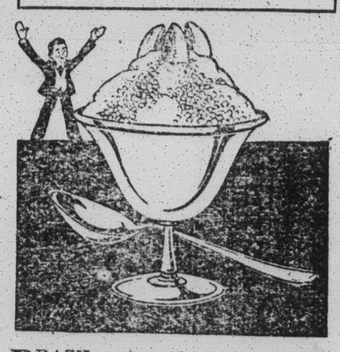
He is survived by two sons, Paul Jennings, and Robert Pract Jennings, Los Angeles; a sister, Mrs. Eliza J. Smith, San Diego, and two brothers Edward Jennings and George S. Jennings, both of Winfield, Kansas. Services will be announced later by Johnson-Saum mortuary.

COMMITTEE MEETING

Rummage sale committee meets for business and pot-luck luncheon March 29, 10 a. m., at home of Mrs. Lewis, 525 Westborne St., La Jolla.

Hints for Homemakers

By Jane Rogers



BRAZIL nut sundaes make fascinating new party desserts. Because of the variety of ways in which the nuts may be prepared and blended with sauces, a wide range of flavors and distinctive garnishment is opened to your inventive turn of mind.

Those gleaming white aristocrats from the Amazon jungle may be served as they come from the shell or roasted. They may be sliced, split, shredded and chopped. They combine with chocolate and caramel sauce, and may be used with most ice cream flavors. The universal popularity of Brazil nuts assures your success as a hostess when you serve them.

* * *

If you would avoid making an embarrassing faux pas, never confuse plush and modern mohair velvet in describing automobile upholstery. The mohair velvet of today is entirely different from old-style plush, and for practically all purposes has supplanted it. Plush had long pile fibres widely spaced, while modern mohair velvet has a low, closely woven pile that gives it its rich lustre and makes it smoother to the touch.
